The Kentuckiana Regional Planning & Development Agency

includes the federally designated Louisville Metropolitan Planning Organization covering a fivecounty region in two states: Clark and Floyd counties in Indiana; and Bullitt, Jefferson, and Oldham counties in Kentucky. Also includes four square miles in Shelby County, Kentucky.

> FUNDING DISCLAIMER | KIPDA is funded through a variety of funding sources including federal grants from the U.S. Department of Transportation's Federal Highway Administration (FHWA) and Federal Transit Administration (FTA), the Indiana Department of Transportation, the Kentucky Transportation Cabinet, the Transit Authority of River City, and the local member governments. The authors, however, are solely responsible for the findings and conclusions herein, which may not represent the official views or policies of the funding agencies.

> TITLE VI COMPLIANCE | KIPDA fully complies with Title VI of the Civil Rights Act of 1964, the Civil Rights Restoration Act of 1987 and related nondiscrimination statutes and regulations in all programs and activities. KIPDA's website, www.kipda.org, may be translated into multiple languages. Publications and other public documents can be made available in alternative languages and formats, if requested. KIPDA public meetings are always held in ADA-accessible facilities, and in transit-accessible locations when possible. Auxiliary services can be provided to individuals who submit a request at least seven days prior to a public meeting. Requests will be accommodated to the greatest extent possible. Any person who believes they have been aggrieved by an unlawful discriminatory practice by KIPDA under Title VI has a right to file a formal complaint. Any such complaint may be in writing and filed with KIPDA's Title VI Compliance Manager and/ or the appropriate state or federal agency within 180 days of the alleged discriminatory occurrence. For more information on KIPDA's Title VI program or to obtain a Title VI Complaint Form, please visit: https://www.kipda.org/ about/ada-title-vi/, call (502) 266-6084, or email meagen.agnew@kipda.org

O1 INTRODUCTION

In this chapter:

• Overview

OVERVIEW

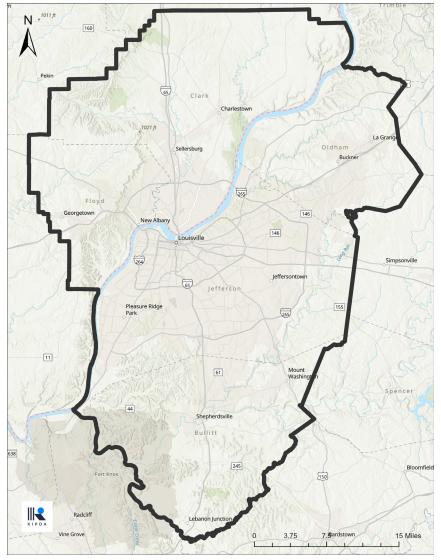

The Kentuckiana Regional Planning and Development Agency's (KIPDA) Transportation Policy Committee (TPC) is designated by the governors of the State of Indiana and the Commonwealth of Kentucky under state and federal laws as the Metropolitan Planning Organization (MPO) for the Louisville/Jefferson County KY-IN Metropolitan Planning Area (MPA) encompassing Clark and Floyd counties in Indiana, and Bullitt, Jefferson, and Oldham counties and a portion of Shelby County in Kentucky. A map of the MPA can be found in **Figure 1**.

On November 15, 2021, President Biden signed the federal transportation authorization, Infrastructure Investment and Jobs Act (IIJA) (Public Law 117-58), into law. This legislation provides federal funding for surface transportation infrastructure planning and investment through Fiscal Year 2026. At the time of this writing, there is no federal transportation infrastructure bill beyond 2026 signed into law. All MPOs are required by the IIJA to develop a fiscally constrained Transportation Improvement Program (TIP) and to update it at least every four years.

The TIP is a short-range, multi-year program of transportation projects approved for funding with federal, state, and local funds within the KIPDA region. The primary purpose of the TIP is to provide the mechanism for scheduling federal funds for surface transportation projects, indicating regional priorities, and demonstrating a short-range transportation vision for the area. Every federally funded transportation project and any state or locally funded project considéred regionally significant must be included in the TIP. A secondary purpose of the TIP is to provide the public with information about these projects. This document includes a listing of all projects with planned funding between fiscal year 2025 to 2028.

The TIP is considered a subset of the Louisville/Jefferson County KY-IN Metropolitan Transportation Plan (MTP), known as <u>Connecting Kentuckiana 2050</u>. KIPDA staff must ensure the TIP is consistent with the MTP. Like the MTP, all projects included in the TIP must conform to the air

FIGURE 1: METROPOLITAN PLANNING AREA

quality-related <u>State Implementation Plans</u> (SIP) of <u>Indiana</u> and <u>Kentucky</u>. All projects and project updates to the TIP must also be included in the Statewide Transportation Improvement Programs (STIP) for the Indiana Department of Transportation (INDOT) and the Kentucky Transportation Cabinet (KYTC).

Projects that are programmed in the TIP are typically selected by one of four agencies: INDOT, KYTC, KIPDA or the Transit Authority of River City (TARC). The two state transportation agencies, INDOT and KYTC, both have the responsibility to award the majority of federal transportation funds that are appropriated through the Federal Highway Administration (FHWA). While some projects originate from the respective state's asset management plans, both INDOT and KYTC make a variety of programmatic funds available annually for competitive calls for projects. KIPDA staff members coordinate with INDOT and KYTC staff to ensure that all necessary projects are included in KIPDA's TIP.

The TPC has the responsibility to award federal transportation funds for several dedicated funding programs. At the present time, KIPDA receives an annual allocation of dedicated funds for six programs in Indiana: Carbon Reduction Program (CRP), Congestion Mitigation and Air Quality (CMAQ), Highway Safety Improvement Program (HSIP),

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program, Surface Transportation Block Grant (STBG) and Transportation Alternatives (TA). In Kentucky, KIPDA only receives an annual allocation of dedicated funds for three programs: CRP, STBG, and TA.

KIPDA's <u>Project Management Guidebook (PMG)</u> provides specific details on how these MPO-dedicated funds are awarded and managed in our region. There are eligibility requirements for the MPO-dedicated funded projects that KIPDA staff ensure are followed. In most situations, a Transportation Technical Coordinating Committee (TTCC) Project Working Group will make recommendations for KIPDA's MPO-dedicated funds based on a variety of factors, most notably the Local Public Agency's (LPA) history of project advancement, MTP project score, and potential contribution toward achieving the MPO performance targets. Recommendations from the Project Working Group must then be supported by the TTCC and approved by the TPC.

As the designated recipient of Federal Transit Administration (FTA) funds in the KIPDA region, TARC has the responsibility to determine how to use the formula program funds that are allocated by FTA. Each year, TARC receives funds through both the Urbanized Area Formula Program (Section 5307) as well as the Grants for Bus and Bus Facilities Formula Program (Section 5339). Additionally, TARC manages the competitive selection process for the region's Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) program. These programs are explained further in the funding section.

O2 TIP PROCESSES

In this chapter:

- Development of a New TIP
- Changes to the TIP
- Group Projects Policy
- Project Families

DEVELOPMENT OF A NEW TIP

Every two years, KIPDA staff collaborate with partner agencies to create a new TIP, which must receive approval from the TPC. For the development of the FY 2025 – FY 2028 TIP, KIPDA coordinated with all eligible project sponsors in the region to ensure they understood how programming decisions would be made. As noted, the TIP is a subset of the Metropolitan Transportation Plan (MTP). The development of the FY 2025 – FY 2028 TIP is consistent with the previous TIP, which was developed in conjunction with *Connecting Kentuckiana 2050*. KIPDA staff ensured that the schedule of TIP development activities was communicated clearly and early to the public, project sponsors, and committee members through committee meeting presentations and notifications of project update deadlines.

All projects are assigned a unique project ID (known as a KIPDA ID), intended to remain associated with the project through completion. Projects that receive MPO-dedicated funds, as well as projects that were awarded funding by INDOT, KYTC, and TARC were compiled into a comprehensive list and included in the FY 2025 – FY 2028 TIP. The project list, along with the TIP narrative, performance-based planning documentation, and additional financial information were presented to the TTCC for recommendation, followed by the TPC for approval.

It is essential to recognize that all projects previously programmed in the <u>FY 2023 – FY 2026 TIP</u> were legacied in, including those with MPO-dedicated funds, thereby honoring prior financial commitments. The Project Working Group was utilized to make funding recommendations to the committees for any FY 2025 – FY 2028 MPO-dedicated funds available for award. The Project Working Group recommendations were then taken to KIPDA's committees for TTCC recommendation, and TPC approval.

After TPC approval, the FY 2025 – FY 2028 TIP was submitted to the United States Environmental Protection Agency (EPA), FHWA, FTA for federal review and approval of the document. Subsequently, KIPDA will send the new TIP to INDOT and KYTC for incorporation in each state's respective STIP.

CHANGES TO THE TIP

Due to the dynamic nature of transportation projects, as they move through the implementation process, the TIP must be modified on a regular basis. There are two different processes that KIPDA follows when modifying the TIP.

The amendment process is typically used when making major project changes, while other, minor project changes may follow the expedited administrative modification process. KIPDA will make every effort to update the TIP with changes to new and existing projects as timely as possible within current policy guidelines and project update schedules. More detailed information about the two different processes is provided in the next few pages.

Amendments

The process of amending the TIP is much more onerous and time-consuming than the administrative modification process. There are three primary reasons for this: the first is that changes deemed regionally significant must be presented to the public, along with an opportunity for them to provide comments. Additionally, these regionally significant changes must be presented to and formally approved by the TPC. Finally, any project that affects air quality (i.e. non-exempt), such as widening or reconfiguring a surface street or interstate, must be analyzed further to ensure conformity with the national air quality standards set by the EPA.

More specifically, the amendment process applies to projects that meet any of the following conditions:

- Adding or removing a federally funded project or project phase(s) that is regionally significant and is not eligile for an administrative modification
- Substantive change in the design concept or scope of the project
- Change in project costs that triggers a new fiscal constraint determination
- Change to a project that affects air quality conformity determination. This can include changes to the open to public date that will lead to modeling year analysis updates.

See the figure below for more information about the steps involved in the TIP amendment process.

TASK	TIME FRAME
Sponsors submit project changes	5-15 Days
Staff reviews proposed changes	15-30 Days
Air quality analysis (If needed)	30-45 Days
Public review and comment period	15 Days
Consideration and approval by KIPDA committees	15 Days

FIGURE 2: TIP AMENDMENT PROCESS

Annually, KIPDA processes between one to four TIP amendments per year. KIPDA staff are in continual coordination with sponsors about their project needs and potential updates that are required to be included in the TIP.

Administrative Modifications

It is possible to process an administrative modification to the TIP for eligible, minor changes. KIPDA staff must present administrative modifications to the TPC for informational purposes. However, they do not need approval by KIPDA's committees, nor are they required to be presented to the public.

The following project changes may be made through administrative modification:

- Correcting obvious minor data entry errors
- Splitting or combining projects without modifying the original project intent
- Changing or clarifying elements of a project description without modifying the original project intent
- Moving a project from one funding category to another
- Shifting the schedule of a project or phase within the years covered by the TIP as long as there is no impact on fiscal constraint
- Adding Planning, Design (D), Preliminary Engineering (PE), Right-of-Way (R), or Utilities (U) phases to a construction project that is already in the TIP/STIP
- Moving any identified project phase programmed for a previous year into a new TIP (rollover provision)

In addition to minor project changes, new projects may be added to the TIP if they qualify through KIPDA's <u>Group</u> <u>Projects Policy</u>. Eligible projects must meet a number of criteria including whether the project is exempt from air quality conformity. More information about the policy is provided in the next section.

Two new scenarios for making project updates through administrative modification have been added to KIPDA's policies since the adoption of the previous TIP. In the past, no changes to the MTP were permitted. The new policy updates (shown below) have been approved by the TPC and allow for limited, specific types of updates to the MTP.

- Existing projects that are shown in both the TIP and MTP where the total cost programmed in the TIP to date has exceeded the total estimated project cost in the MTP may now be updated
- Small-scale, exempt, MTP-only projects are eligible to enter the fiscally constrained TIP when funding becomes available and remain in the MTP if they would otherwise satisfy a group category requirement

These policy updates were deemed beneficial for differing reasons. The first one is for improved internal recordkeeping and alignment of the TIP and MTP project cost information. The second policy update supports KIPDA's initiative to encourage sponsors to add tentative, small-scale projects to the MTP, as applicable. Group projects are eligible to expedite additions to the TIP through administrative modification and now, so are these types of MTP-only projects. It is important to note that these MTP-only projects have already undergone the scrutiny of the amendment TIP Processes - 17 FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

process when they were submitted to enter the MTP.

Typically, KIPDA will create one administrative modification per month. The administrative modifications are presented to the TPC at the next scheduled meeting. If an update is not submitted in time, KIPDA will process the project change at the next available opportunity.

GROUP PROJECT POLICY

The group project concept serves as a means to more efficiently advance projects through the transportation planning process. It is also a way to recognize the collective contributions of relatively small-scale transportation projects to the region's transportation system.

Group projects are assigned a KIPDA ID as well as a Group ID designating the eligible group category. There are eight categorical group project IDs shown below with a distinct four digit code per state.

GROUP PROJECT CATEGORIES & IDS

Air Quality Improvements (Indiana ID: 2672/ Kentucky ID: 2671)

Roadway and Bridge Preservation and Rehabilitation (Indiana ID: 2676 / Kentucky ID: 2675)

Safety Improvements (Indiana ID: 2680 / Kentucky ID: 2679)

Transportation Enhancements (Indiana ID: 2684 / Kentucky ID: 2683) Bicycle and Pedestrian Improvements (Indiana ID: 2674 / Kentucky ID: 2673)

Roadway Operational Improvements (Indiana ID: 2678 / Kentucky ID: 2677)

Transit Improvements (Indiana ID: 2682 / Kentucky ID: 2681)

Transportation Studies (Indiana ID: 2686/ Kentucky ID: 2685)

All group projects must continue to meet the category requirements, as dicussed further within this chapter, for the life of the project. The total estimated project cost thresholds are carefully considered when determining eligibility. If an existing group project later exceeds the respective threshold of the assigned group category, it will need to be processed through an amendment. It will remain in the TIP with the removal of the Group ID and be added to the MTP as an individual project.

KIPDA staff use their discretion to add projects to the group categories. All group projects must meet the group project policy requirements; however, all projects that meet the requirements are not necessarily added to the group categories. The policy is optional. All projects have the potential to enter TIP and MTP as individual projects through the amendment process as well.

MTP

Group projects are referenced collectively in the MTP by listing each of the eight group project categories to provide financial accountability for relatively small-scale projects and studies. The group project categories in the MTP are considered financial placeholders. The total estimated expenditures of each category are detailed in the <u>MTP</u> on pages 145-148. As a reminder, the TIP is a subset of the MTP.

All group project categories are based on mode or purpose and are not subject to subdivision based on local

jurisdiction or project sponsor. Within each state, group categories are available for all jurisdictions and sponsors. Without exception, the group project eligibility requirements and policies are the same in the MTP and TIP.

TIP

With appropriate demonstration of fiscal constraint, group project categories are eligible for inclusion in the TIP. Group project categories allow for an administrative modification of the TIP to include eligible new projects. Individual group projects with programmed federal funds are directly listed in the TIP and include a Group ID. The Group IDs displayed in the TIP refer to the categories detailed in the MTP.

For a project to be considered for administrative modification based on a group category, the following are required:

- The proposed project or program meets the eligibility requirement of a group project category
- The proposed project or program meets the guidelines and standards for being added to the TIP

Performance Management Plan

The anticipated performance-based contributions of projects and programs that meet the eligibility requirements of a group project category are accounted for in the KIPDA <u>Performance Management Plan</u>.

Group Project Categories and Eligibility Requirements

The anticipated performance-based contributions of each prospective group project must meet the eligibility requirements of one of the following categories.

Air Quality Improvements

Projects and programs in the Air Quality Improvements Group are intended to provide for a healthier region by reducing mobile source air pollutants.

Examples of Air Quality Improvements include, but are not limited to:

- Ridesharing and vanpooling
- Park and ride facilities
- Traffic flow improvement programs that demonstrate emissions reductions
- Programs for improved public transit
- Bicycle and pedestrian improvements (not including the rehabilitation of existing facilities)
- Employer-based transportation management plans, including incentives

For projects and programs to be considered for the Air Quality Improvements Group, the projects and programs:

- Must contribute to improving air quality and meet any of the project and program criteria as defined in Section 108(f) of the Clean Air Act of 1990
- Must contribute to meeting KIPDA Performance Targets
- May not have a total project cost over \$1,000,000
- May not be considered regionally significant as defined in 23 CFR 450.104
- May contribute to a reduction in vehicle miles traveled
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127

Bicycle and Pedestrian Improvements

Projects and programs in the Bicycle and Pedestrian Improvements Group are intended to enhance connectivity for functional trips undertaken by cyclists and pedestrians.

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

Examples of Bicycle and Pedestrian Improvements include, but are not limited to:

- Sidewalks
- Bicycle lanes
- Shared use paths
- Crosswalks and cross-signals
- Pedestrian islands
- Rehabilitation of existing pedestrian and bicycle facilities
- Curb ramps
- Signage

For projects and programs to be considered for the Bicycle and Pedestrian Improvements Group, the projects and programs:

- Must improve modal connectivity for cyclists and pedestrians completing functional trips
- May not have a total project cost over \$1,000,000
- Must contribute to meeting KIPDA Performance Targets
- May not be considered regionally significant as defined in 23 CFR 450.104
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127
- Must meet ADA accessibility requirements as defined by 28 CFR 35.151
- Are encouraged to:
 - Support the KIPDA Bicycle and Pedestrian planning process
 - Improve bicycle and pedestrian connectivity with transit
 - Reduce automotive trips, trip length, and mobile source emissions
 - Rehabilitate existing bicycle and pedestrian facilities that have deteriorated
 - Assist with meeting ADA requirements

Roadway and Bridge Preservation and Rehabilitation

Projects in the Roadway and Bridge Preservation and Rehabilitation Group are intended to protect and maintain the transportation infrastructure efficiently.

Examples of Roadway and Bridge Rehabilitation include, but are not limited to:

- Pavement resurfacing
- Roadway and bridge rehabilitation
- Preventative maintenance
- Bridge replacement
- Bridge painting
- Bridge inspection

For projects to be considered for the Roadway and Bridge Preservation and Rehabilitation Group, the projects:

- Must preserve the existing roadways and/or bridges, retard their future deterioration, and/ or contribute to a safer traveling experience
- May not have a total project cost over \$15,000,000
- Must contribute to meeting KIPDA Performance Targets
- May not be considered regionally significant as defined in 23 CFR 450.104
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127

Roadway Operational Improvements

Projects and programs in the Roadway Operational Improvements Group are generally considered low-cost traffic improvements that do not add either capacity for single-occupant vehicles or additional roadway miles.

Examples of Roadway Operational Improvements include, but are not limited to:

- Signal timing optimization
- Turning lanes
- Pavement striping
- Lane assignment changes
- Signage and lighting

For projects and programs to be considered for the Roadway Operational Improvements Group, the projects and programs:

- Must improve the flow of traffic
- May not have a total project cost over \$1,000,000
- Must contribute to meeting KIPDA Performance Targets
- May not be considered regionally significant as defined in 23 CFR 450.104
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127

Safety Improvements

Projects and programs in the Safety Improvements Group are intended to reduce crashes on all public roadways and transit.

Examples of Safety Improvements include, but are not limited to:

- Guardrails
- Signage
- Lighting improvements
- Pedestrian crosswalks and crossing signals
- Intersection improvements
- Access to transit stops
- Transit boarding and lighting
- Education and awareness programs
- Railroad / Roadway Crossing Improvements

For projects and programs to be considered for the Safety Improvements Group, the projects and programs:

- Must contribute to reducing crashes, including those that involve bicyclists or pedestrians; or enhance public transportation safety
- May not have a total project cost over \$2,000,000
- Must contribute to meeting KIPDA Performance Targets
- May not be considered regionally significant as defined in 23 CFR 450.104
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127
- Are encouraged to:
 - Address safety concerns found at the KIPDA High Crash Locations
 - Consider the FHWA Proven Safety Countermeasures
 - Consider HSIP Eligible projects criteria as defined in 23 USC 148(a)(4)(B)
 - Support the National Public Transportation Safety Plan
 - Support the Public Transportation Agency Safety Plan as defined in 49 CFR Part 673

Transit Improvements

Projects and programs in the Transit Improvements Group are intended to enhance the operation of public transit and to contribute to maintaining, and when possible, increasing its utilization.

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

Examples of Transit Improvements include, but are not limited to:

- Bus stop improvements
- On-board transit amenities
- Facility improvements
- Bicycle and pedestrian facilities that improve non-motorized access to transit
- Park-and-ride facilities
- Transit education and awareness programs
- Rolling stock purchases, updates, and modifications

For projects and programs to be considered for the Transit Improvements Group, the projects and programs:

- Must contribute to enhancing the operation of public transit and contribute to maintaining, and when possible, increasing its utilization
- May not have a total project cost over \$1,000,000
- Must contribute to meeting KIPDA Performance Targets
- May not be considered regionally significant as defined in 23 CFR 450.104
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127

Transportation Enhancements

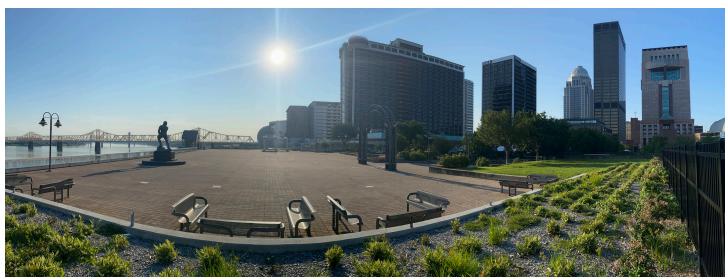

Projects and programs in the Transportation Enhancement Group are intended to provide for transportation-related environmental mitigation and beautification to the transportation system.

Examples of Transportation Enhancements include, but are not limited to:

- Streetscapes
- Landscaping
- Stormwater management
- Pedestrian and cyclist amenities such as benches and bicycle racks
- Inventory control or removal of outdoor advertising
- Preservation and rehabilitation of historic transportation facilities

For projects and programs to be considered for the Transportation Enhancements Group, the projects and programs:

- Must contribute to enhancing the transportation system
- May not have a total project cost over \$1,000,000
- May not be considered regionally significant as defined in 23 CFR 450.104
- Must be categorized as an Air Quality Exempt project as defined in 40 CFR 93.126 and 93.127

22 - TIP Processes

Transportation Studies

The Transportation Studies Group is intended to facilitate research, review, and consideration of solutions to various transportation issues and enhancements.

Examples of Transportation Studies include, but are not limited to:

- Corridor studies
- Transit studies
- Bicycle facilities studies
- Pedestrian facilities studies
- Anticipated demographic changes and Transportation Demand Management

For studies to be considered for the Transportation Studies Group, the studies:

- Must contribute to a more informed decision-making process, as well as a more efficient and expeditious project and program development and advancement,
- May not have a total project cost over \$1,000,000
- Must demonstrate consideration of contributing to achieving KIPDA Performance Targets
- When applicable, are encouraged to:
 - o Include consideration of various modal opportunities
 - Include consideration of TSMO strategies (including ITS and TDM)
 - Include a well-rounded community engagement process, including early and continuous involvement
 - o Include consideration of KIPDA's Congestion Management Process

PROJECT FAMILIES

Occasionally it makes sense for a sponsor to develop project families. This might occur when projects first enter the MTP or TIP, or existing projects might be re-structured administratively to reflect a parent-child relationship. Family structured projects are different from group projects because there are no total cost thresholds or associated group categories and changes are processed similar to individual or stand-alone project updates.

Parent Projects

Projects designated as "parent" projects are meant to represent a "family" of smaller, related projects. Typically, the parent project is listed only in the MTP, and TIP funding is programmed to the respective "child" project (not listed in the MTP). When a parent project is made from an existing project with previously obligated funding, that funding stays with the parent project KIPDA ID and all new funding is programmed in the TIP with the respective child project.

The total estimated project cost shown with the parent KIPDA ID in the MTP should be the sum of all anticipated total estimated project costs of the child KIPDA IDs. Any required air quality conformity analysis (described in more detail in <u>Chapter 07</u>) must account for the entire project family, thus the parent project description and project limits displayed on the <u>MTP projects map</u> should cover all sections of the entire project.

Child Projects

Child projects are parts of a greater parent project and are listed in the TIP with a unique KIPDA ID as well as the respective parent KIPDA ID. To avoid duplicating the costs already accounted for in the MTP with the parent listing, child projects are only listed in the TIP. Aside from referencing the parent KIPDA ID, a child project listing is limited to the details relevant only to the specific project section represented by the child KIPDA ID. This includes the total estimated project cost, the total cost programmed in the TIP to date, the project description, and the project limits displayed on the <u>TIP projects map</u>.

24 - TIP Processes

O3 FUNDING

In this chapter:

- Roadway
- Financial Plans
- Operations and Maintenance
- Public Transportation

The IIJA furthers the commitment to funding programs for highways, transit, bicycle, and pedestrian programs that were established in previous transportation acts. The IIJA creates a streamlined, performance-based program and provides the funds necessary to maintain and improve our nation's transportation infrastructure.

ROADWAY

The following programs primarily focus on strengthening America's highways, establishing a performance-based program, creating jobs, supporting economic growth, supporting the Department of Transportation's safety agenda, streamlining transportation programs, accelerating project delivery and promoting innovation. Funding for roadways is provided for projects through several core formula programs. The list of funding sources below is not exhaustive but merely highlights some of the major funding sources utilized within the TIP. Although there are different agencies that have the authority to award funds from different programs, the TPC and KIPDA staff still have the ultimate responsibility to officially program (i.e. add) the projects and the associated funds TIP.

KIPDA receives sub-allocated formula funds from some of the funding sources listed below. These sub-allocated MPO-dedicated funding sources are programmed to transportation projects in the KIPDA region based upon the approval of the TPC. For more information about how MPO-dedicated funding is programmed by KIPDA, see Chapter O6 - Project Specific Reports.

National Highway Performance Program (NHPP)

The National Highway Performance Program (NHPP) provides funding for projects on the National Highway System (NHS) for construction of new facilities on the NHS, and to ensure that investments of federal aid funds in highway construction support the achievement of performance targets.

NHPP projects must be on an eligible facility, and support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS.

NHPP eligible activities include the following:

- Construction, reconstruction, resurfacing, restoration, rehabilitation, preservation, or operational improvements of NHS segments
- Construction, replacement (including replacement with fill material), rehabilitation, preservation, and protection (including scour countermeasures, seismic retrofits, impact protection measures, security countermeasures, and protection against extreme events) of NHS bridges and tunnels
- Bridge and tunnel inspection and evaluation on the NHS and inspection and evaluation of other NHS highway infrastructure assets
- Training of bridge and tunnel inspectors
- Construction, rehabilitation, or replacement of existing ferry boats and facilities, including approaches that connect road segments of the NHS
- Construction, reconstruction, resurfacing, restoration, rehabilitation, and preservation of, and operational improvements for, a federal-aid highway not on the NHS, and construction of a transit project eligible for assistance under chapter 53 of title 49, if the project is in the same corridor and in proximity to a fully access-controlled NHS route, if the improvement is more cost-effective (as determined by a benefit-cost analysis) than an NHS improvement, and will reduce delays or produce travel time savings on the NHS route and improve regional traffic flow
- Bicycle transportation and pedestrian walkways
- Highway safety improvements on the NHS
- Capital and operating costs for traffic, and traveler information and monitoring
- Management, and control facilities and programs

- Development and implementation of a State Asset Management Plan for the NHS including data collection, maintenance and integration, software costs, and equipment costs
- Infrastructure-based ITS capital improvements
- Environmental restoration and pollution abatement
- Control of noxious weeds and establishment of native species
- Environmental mitigation related to NHPP projects
- Construction of publicly owned intracity or intercity bus terminals servicing the NHS

Additional eligible uses of NHPP funds are workforce development, training, and education activities. The typical federal share of NHPP funds for a project is 80%, but that share is reduced to 65% as a penalty if a state has not implemented an asset management plan within the established time frame.

Railway-Highway Crossing Hazard Elimination (Rail Safety)

This program provides funding for safety improvements to reduce the number of fatalities, injuries, and crashes at public railroad grade crossings. Of the total received by each state, 50% must be set aside for the installation of protective devices at railway-highway crossings. The federal share of Railway-Highway Crossings projects is 90%. INDOT and KYTC have the authority to award these funds.

Surface Transportation Block Grant (STBG)

The Surface Transportation Block Grant (STBG) is a funding category that provides flexible funding to be used by states and Metropolitan Planning Organizations to preserve and improve the federal-aid highway, bridge and tunnel projects, pedestrian and bicycle infrastructure, and transit capital projects.

From the federal money allocated to a state for distribution through STBG, a proportionate share of funds is set aside for the state's Transportation Alternatives (TA) program, as well as for state planning and research, and off-system bridges.

Fifty percent of the apportionment can be used in any area of the state, while the other fifty percent is sub-allocated as follows:

- Urbanized areas with a population greater than 200,000 (referred to as Transportation Management Areas, or TMAs) will receive a portion based on their relative share of population
- Areas with a population greater than 5,000 but no more than 200,000 receive funding for projects identified by the state in consultation with the regional planning organization
- Areas with a population of 5,000 or less

STBG funds, allocated to the Louisville/Jefferson County KY-IN MPA, are to be awarded on a priority basis that is determined by the MPO in consultation with the state's respective Department of Transportation, in this case either KYTC or INDOT. These MPO-controlled STBG funds are referred to as "STBG-MPO" in the TIP. STBG monies obligated to the areas outside a TMA are to be spent at the discretion of the state department of transportation. INDOT and KYTC have the authority to award the state's share of STBG funds to projects within the Louisville/ Jefferson County KY-IN MPA. STBG funds controlled by a state department of transportation are referred to as "STBG-ST" in the TIP.

STBG funds typically represent an 80% federal obligation toward the cost of each project; although, there are circumstances where the federal obligation can reach 90% or even 100%.

Congestion Mitigation and Air Quality Improvement Program (CMAQ)

Projects and programs that assist in the attainment or maintenance of standards for air quality outlined in the Clean Air Act Amendments of 1990 are eligible to use Congestion Mitigation and Air Quality Improvement Program (CMAQ) funds. Eligible projects must:

- Contribute to the attainment or maintenance of a national ambient air quality standard or;
- Be an element of a strategy that will contribute to the attainment or maintenance of a national ambient air quality standard

In Kentucky, the MPO recommends priorities for their non-attainment/maintenance area, and the responsibility for determining final priorities for funding rests with the state. In Indiana, the MPO controls which projects are programmed with CMAQ funds. CMAQ funds typically represent an 80% federal obligation toward the cost of each project; although, there are circumstances where the federal obligation can reach 90% or even 100%. CMAQ funds controlled by the MPO are referred to as "CMAQ-MPO" in the TIP, while CMAQ funds controlled by a state transportation agency are referred to as "CMAQ-ST" in the TIP.

Highway Safety Improvement Program (HSIP)

The Highway Safety Improvement Program (HSIP) provides funding dedicated to highway safety. These are federal funds aimed at reducing traffic fatalities and serious injuries on all public roads. Responsibility for establishing priority for HSIP projects in Kentucky rests with KYTC. In Indiana, INDOT sub-allocates funds to the MPOs. HSIP funds controlled by a state transportation agency are referred to as "HSIP-ST" in the TIP. HSIP funds controlled by the MPO are referred to as "HSIP-MPO" in the TIP. The federal share of HSIP projects is typically 90%; although there are circumstances where the federal obligation can reach 100% of the cost of a project.

Transportation Alternatives (TA)

The Transportation Alternatives (TA) program was established to fund alternative transportation projects, most notably for bicyclists and pedestrians. Eligible uses of transportation alternative funds include all projects and activities that were previously eligible under the Transportation Alternatives Program (TAP) under the Moving Ahead for Progress in the 21st Century Act (MAP-21). This encompasses a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, recreational trails, safe routes to school projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity. Fifty percent of the state's TA apportionment is sub-allocated by both Indiana and Kentucky to MPOs based on their relative share of the total state population. TA funds controlled by a state transportation agency are referred to as "TA-ST" in the TIP. TA funds controlled by the MPO are referred to as "TA-MPO" in the TIP. TA funds the cost of each project; although, there are circumstances where the federal obligation can reach 90% or even 100%.

Carbon Reduction Program (CRP)

The IIJA establishes the Carbon Reduction Program (CRP), which provides funds for projects designed to reduce transportation emissions, defined as carbon dioxide (CO2) emissions from on-road highway sources. States, in consultation with MPOs, are required to develop a carbon reduction strategy within two years of program enactment and update that strategy at least every four years. A portion of a states' CRP apportionment must be sub-allocated to MPOs based on the MPO's relative share of the states' population. CRP funds controlled by a state transportation agency are referred to as "CRP-ST" in the TIP. CRP funds controlled by the MPO are referred to as "CRP-MPO" in the TIP. CRP funds typically represent an 80% federal obligation toward the cost of each project; although, there are circumstances where the federal obligation can reach 90% or even 100%.

Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program

The IIJA established the Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program to help make surface transportation more resilient to natural hazards including sea level rise, flooding, extreme weather events, and other natural disasters through support of planning activities, resilience improvements, community resilience and evacuation routes, and at-risk cost infrastructure.

The federal share for PROTECT planning grants is 100% and the federal share for implementation projects are typically 80% with a few exceptions. An eligible entity may use federal funds other than federal funds provided under the PROTECT discretionary grant program to meet the non-federal cost share requirement for a project carried out with a grant under the PROTECT discretionary grant program.

Other Roadway Programs

There are many other roadway programs that FHWA manages such as the Intelligent Transportation System (ITS) Research and Development Program, Bridge Investment Program (BIP), Bridge Formula Program (BFP), Off-system Bridge Replacement and Rehabilitation Program (BRO), Better Utilizing Investments to Leverage Development (BUILD) grant program, and the Safe Streets and Roads for All (SS4A) grant program among other funding sources. The majority of these funding sources are competitively awarded by the FHWA. More information about all FHWA programs under IIJA is available here.

FINANCIAL PLANS

The IIJA requires the MPO to ensure the funds in the TIP are based on the year of expenditure, meaning they are adjusted to reflect how much each phase of a project will cost in the year in which they are scheduled. All agencies are instructed to submit project information to KIPDA based on the projected year of expenditure. KIPDA staff review submitted project cost estimates from MPO-dedicated project applications to ensure that estimates account for future inflation in a reasonable manner. For non-MPO-dedicated projects KIPDA relies upon cost estimate policy/guidance from KYTC, TARC, and INDOT. The TIP must be fiscally constrained, which means the MPO cannot program more dollars in the TIP than anticipated to be received between FY 2025 – FY 2028. A financial plan of federal funds programmed in the TIP for FY 2025 -FY 2028 is shown in **Figures 3A**, **3B**, **3C**, **3D** for Indiana programs and **Figures 4A**, **4B**, **4C**, **4C** for Kentucky programs. Fiscal constraint for state-controlled funding sources in the KIPDA TIP are confirmed by the state-wide fiscal constraint shown in both the Kentucky FY 2025-FY 2028 STIP and the Indiana FY 2024-FY 2028 STIP. Just as MPOs must update the TIP, it is anticipated that the state transportation agencies will update the STIPs.

OPERATIONS AND MAINTENANCE

The maintenance of all interstates and state routes is the responsibility of the INDOT and the KYTC. Other local agencies also have the responsibility of maintaining certain city/county-owned facilities. The amounts provided are the total costs including local, state and federal funds. \$259,122,141 is anticipated to be expended over the four-year period of the TIP to maintain the roadways in Clark and Floyd counties. \$660,447,099 is anticipated to be expended over the four-year period to maintain roads in Bullitt, Jefferson, and Oldham counties. The majority of the transit revenue is derieved from Louisville's Mass Transit Trust Fund with additional funding from customer fare receipts, advertising and state contributions. TARC estimates a total revenue of \$341,361,281 for the Capital Investment . This excludes federal formula funds but includes the local funds used for the required match funding. TARC estimates the total TARC revenue of \$419,549,521 for the TIP years 2025-2028.

PUBLIC TRANSPORTATION

The IIJA also provides programmatic funding to enhance safety in public transportation and emphasizes restoring and replacing aging public transportation infrastructure.

Section 5307: Urbanized Area Formula Grants

The Section 5307 program provides grants to urbanized areas for public transportation capital, planning, as well as operating expenses in certain circumstances. Eligible activities include planning, engineering, design and evaluation of transit projects and other technical transportation-related studies; capital investments in bus and bus-related activities such as replacement, overhaul and rebuilding of buses, crime prevention and security equipment and construction of maintenance and passenger facilities; and capital investments in new and existing fixed guideway systems including rolling stock, overhaul and rebuilding of vehicles, station infrastructure, track, signals, communications, and computer hardware and software. In addition, associated transit improvements, workforce development activities, and certain expenses associated with mobility management programs are eligible under the program. All preventive maintenance and some Americans with Disabilities Act complementary paratransit service costs are considered capital costs. Operating costs in areas with fewer than 200,000 in population are also an eligible expense.

TARC receives an annual allocation of funds through this program. The federal share is 80% for capital assistance, and 80% for Americans with Disabilities Act (ADA) non-fixed-route paratransit service. TARC is generally not eligible to use these funds for operating assistance. TARC estimates a total of \$71,883,816 in Federal Section 5307 Urbanized Area Formula grant funds for the current TIP years.

Section 5309: Fixed Guideway Capital Investment Grant (New starts)

Section 5309 is a discretionary program that provides grants for new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors. Eligible projects include new fixed guideways or extensions to fixed guideways (projects that operate on a separate right-of-way exclusively for public transportation, or that include a rail or a catenary system), bus rapid transit projects that operate in a separated right-of-way dedicated for public transportation use during peak periods, and projects that improve capacity on an existing fixed-guideway system. The maximum federal share is 80%.

This is a discretionary grant program whereby transit agencies are required to complete a series of steps over several years before receiving grant funds. These funds are very competitive.

Section 5310: Enhanced Mobility of Seniors and Individuals with Disabilities

The goal of the Section 5310 program is to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

These funds have two specific requirements: 38 - Funding

- At least 55% of program funds must be used on capital projects that are: public transportation projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities when public transportation is insufficient, inappropriate, or unavailable.
- The remaining 45% may be used for: public transportation projects that exceed the requirements of the ADA public transportation projects that improve access to fixed-route service and decrease reliance by individuals with disabilities on complementary paratransit alternatives to public transportation that assist seniors and individuals with disabilities.

Section 5339 (a) and (b): Bus and Bus Facilities Formula and Competitive Programs

The Grants for Buses and Bus Facilities program (49 U.S.C. 5339(a)) makes federal resources available to states and designated recipients to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities including technological changes or innovations to modify low or no emission vehicles or facilities. Eligible Recipients include designated recipients that operate fixed route bus service or that allocate funding to fixed route bus operators; and state or local governmental entities that operate fixed route bus service that are eligible to receive direct grants under the 5307 program.

The Grants for Buses and Bus Facilities Competitive Program (49 U.S.C. 5339(b)) makes federal resources available to states and direct recipients to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities. Funding is provided through competitive grants. TARC estimates a total of \$6,304,424 in Federal Section 5339 Formula Bus and Bus Facility for the current TIP years. See figures 7A for the FY25 and 7B for the FY26 programmed

funds. Fiscal years 2027 and 2028 have not been programmed at the time of this writing.

Transit Program of Projects (POP)

Transit projects requesting federal funds must be included in the TIP and endorsed by the TPC. TARC receives the majority of Federal Transit Administration (FTA) formula funding through the Urbanized Area Formula Grants (Section 5307) and Bus and Bus Facilities Program (Section 5339); however, there are several small, traditionally non-profit and/or private agencies that may be awarded funding through the competitive Enhanced Mobility of Seniors and Individuals with Disabilities Program (Section 5310). FTA Section 5310 grants are available to private non-profit groups to assist them in providing transportation services to elderly and disabled persons for whom mass transit services are unavailable, insufficient, or inappropriate. TARC is also eligible to apply for Federal Highway Administration (FHWA) funds through the CMAQ, CRP, PROTECT, STBG, and TA programs.

TARC's proposed Fiscal Year 2025-2030 POP for FTA Sections 5307 are shown in **Figures 5A** (pg 41) and **5B** (pg 42). Fiscal years 2027 and 2028 have not been programmed at the time of this writing. FTA Section 5310 projects are usually added to the TIP by administrative modification because the funds are awarded competitively on an annual basis. The anticipated annual allocations for FTA Section 5310 funds can be found in **Figure 6** (pg 43). ARC's proposed Fiscal Year 2025 - 2030 POP for FTA Section 5339 funds can be found in **Figures 7A** and **7B** (pg. 44). Fiscal years 2027 and 2028 have not been programmed at the time of this writing. As additional funds are awarded, the TIP will be updated to add the newly awarded transit projects. Any FHWA funds that a transit agency receives are also listed in the TIP.

Lastly, TARC has provided additional financial information for incorporation in the TIP. TARC provides statements of capital and operating expenditures and revenues, contribution sources and subsidy amounts, use of the local Mass Transit Trust Fund, and a projected operating statement as depicted in **Figures 8A**, **8B**, **9A**, **9B**, and **9C** (pgs. 45-48). TARC's five-year Capital Improvement Program is shown in **Figures 10A** and **10B** (pgs. 49-50).

These statements are included in the TIP as required by the FTA and to provide the public an opportunity to review the financial plans of TARC.

Other Transit Funds

In 1976, the Kentucky General Assembly appropriated funds to allow the Kentucky Transportation Cabinet (KYTC) to begin matching public transportation capital grants. Since that time, KYTC has been able to provide up to half of the non-federal share of capital costs, within budgetary limitations. All transit systems operating in Kentucky are requested to annually review their capital equipment needs for the coming three-year period. The resulting Kentucky Public Transportation Capital Improvement Program is used as the basis for awarding state funds.

The Indiana Department of Transportation (INDOT) provides funds from the Public Mass Transpor-tation Fund to match federal transit grants. Created in 1980, the fund is derived from a dedication of 0.76 percent of the state's seven percent general sales and use taxes. The state helps provide up to two-thirds of the non-federal share required to match a federal capital or operating grant by matching up to 100 percent of the locally derived income up to the allocation amount. State funds are allocated each calendar year by a performance-based formula. Local funding for TARC is provided by a one-fifth of one percent occupation tax approved by the voters of Louisville

and Jefferson County on November 4, 1974. The occupational tax became legally effective on January 1, 1975, and can be used by TARC for operating and capital matching funds.

O4 PLANNING EFFORTS

In this chapter:

- Americans with Disabilities Act & Title VI
- Performance Management Plan
- Transit Asset Management Plan
- Public Transportation Agency Safety Plan
- Carbon Reduction Strategy
- Complete Streets Policy
- Strategic Highway Safety Plan
- Coordinated Humans Services
 Transportation Plan
- Congestion Management Process (CMP) Projects
- Intelligent Transportation Systems (ITS) Supported Projects

AMERICANS WITH DISABILITIES ACT & TITLE VI

In accordance with federal law, TIP projects are selected, and the document is developed and distributed for comment in such a way as to ensure compliance with all applicable requirements of the Americans with Disabilities Act (ADA) of 1990 and Title VI of the Civil Rights Act of 1964. This means the MPO ensures: transportation services, facilities, information and other resources are distributed equally throughout the Louisville/ Jefferson County KY-IN Metropolitan Planning Area (MPA); programs and practices do not adversely impact neighborhoods or groups; efforts are made to obtain minority participation/involvement in the process; and transportation projects and programs serve all members of the community regardless of income, race, age, ability, and any other socioeconomic factors. Complaint procedures for the MPO are outlined in the <u>Public Participation Plan</u>.

The Americans with Disabilities Act (ADA) of 1990 require transit systems to offer accessible fixed route service for people with disabilities. The ADA mandates that transit systems provide complementary paratransit service for those who cannot use accessible fixed route service because of their disability. In addition to TARC's fixed route transit service, which has been 100% accessible since 2000, special services for elderly and disabled persons are offered by TARC. TARC3 provides door-to-door demand responsive paratransit service and TARC goes beyond the ADA regulations by providing work trips to people with disabilities that may live outside of the regular ³/₄ mile access zone surrounding fixed route services.

In addition to transit accessibility, local jurisdictions in the Louisville/Jefferson County KY-IN Metropolitan Planning Area (MPA) have been working diligently to make roadways and sidewalks accessible. Federal transportation funds, as well as local and state funds, have been used to make accessibility improvements.

PERFORMANCE MANAGEMENT PLAN

The TPC has adopted a <u>Performance Management Plan (PMP)</u> which includes both the federally required National Performance Measures and <u>Planning Factors</u> as well as the MPO-developed performance measures. The MPO-developed measures are aligned with the TPC's goals and objectives for the *Connecting Kentuckiana 2050* Metropolitan Transportation Plan (MTP). Performance-based planning is a strategic approach that uses data to support investment decisions which help to achieve performance goals. Implementing a performance-based planning approach increases our understanding of the possible impact a specific project, or group of projects, may have on the transportation system and the people who use it.

One of the most important aspects of the PMP is tracking progress toward achieving the performance targets. The reporting process provides the necessary performance-based feedback to the TPC, as well as our federal, state, local, and community planning partners. For each performance measure, KIPDA will report on data sources, baseline data, historical data, performance targets, and target-setting methodology in the PMP. On a annual basis, KIPDA will report the necessary performance-based feedback to the TPC, as well as our federal, state, local, and community planning partners. KIPDA will report on progress toward achieving performance targets, in a Baseline Performance Period Report, a Mid Performance Period Report, and a Full Performance Period Report.

Each project's score, as well as each project's potential contribution toward achieving the performance targets can be utilized by the Project Working Groups, TTCC and TPC when it comes to project selection and the award of KIPDA's MPO-dedicated funds. This helps ensure that KIPDA is awarding funding to projects to further the region's goals and objectives, which are discussed in greater detail in the following chapter.

TRANSIT ASSET MANAGEMENT PLAN

The IIJA requires all public transportation providers to develop and implement a <u>Transit Asset Management (TAM)</u> plan to achieve and maintain capital items in a state of good repair. A TAM must include an asset inventory, condition assessments of inventoried assets, and a prioritized list of investments to improve the capital assets. The final rule, 49 USC 625, became effective October 1, 2016, and establishes four performance measures for rolling stock (i.e. buses, vans, and trains), equipment, facilities, and infrastructure. In addition to the four national performance measures, transit providers can establish their own performance measures. MPOs are responsible for coordinating with the transit providers in their planning area and establishing targets specific to their planning area.

KIPDA staff began coordinating with TARC, the regional transit authority, shortly after the federal rule became effective. Since that time, several important steps have occurred to ensure compliance with this new rule. KIPDA continues to coordinate with TARC to update the TAM plan which is a part of the MPO's Performance Management Plan.

PUBLIC TRANSPORTATION AGENCY SAFETY PLAN

The IIJA also requires certain public transportation providers that receive federal funds under FTA's Urbanized Area Formula Grants (Section 5307) to develop safety plans that include the processes and procedures to implement Safety Management Systems (SMS). On July 19, 2018, FTA published the final rule which became effective on July 19, 2019.

The final rule sets July 20, 2020, as the deadline for transit providers like TARC to adopt a compliant Public <u>Transportation Agency Safety Plan</u> (PTASP), including safety performance targets. KIPDA continues to coordinate with TARC to update the TAM plan which is a part of the MPO's Performance Management Plan.

CARBON REDUCTION STRATEGY

The IIJA requires that each state, in consultation with any MPO designated within the state, develop a carbon reduction strategy no later than two years after enactment of the Carbon Reduction Program (CRP) and update that strategy at least every four years. The strategy must support efforts to reduce transportation emissions including quantifiable carbon emission reductions. KIPDA worked with INDOT and KYTC as they developed their respective Carbon Reduction Strategy documents—both of which were completed in 2023.

COMPLETE STREETS POLICY

The TPC approved the <u>Complete Streets Policy (CSP)</u> on August 25, 2022. The CSP requires any new projects applying for MPO-dedicated funds to adhere to the policy by either providing bike, pedestrian, and/or transit improvements/facilities or applying for one of seven (7) types of exemptions.

STRATEGIC HIGHWAY SAFETY PLANS

A Strategic Highway Safety Plan (SHSP) is a major component and requirement of the Highway Safety Improvement Program (HSIP). It is a statewide-coordinated safety plan that provides a comprehensive framework for reducing highway fatalities and serious injuries on all public modes. A SHSP identifies a state's key safety needs and guides investment decisions toward strategies and countermeasures with the most potential to save lives and prevent injuries. INDOT's current SHSP was updated in 2022. INDOT's SHSP focuses on adopting a "safe systems approach", which focuses on increasing safety across five basic categories—safe road users, safe vehicles, safe speeds, safe roads, and post-crash care. Protection of "vulnerable road users" is an emphasis in the document. KYTC's SHSP also highlights the state's participation in the <u>American Association of State Transportation Officials</u> (AASHTO) "Toward Zero Deaths" (TZD) safety initiative. KYTC's current SHSP was adopted in 2025.

The over-arching theme between the two states' SHSPs is the focus on preventing severe crashes or those resulting in either a fatality or incapacitating injury. The way to address this is two-fold: educational and awareness campaigns and data analysis. The SHSPs provide information about both. By adopting a SHSP, both states also ensure that they are eligible to use HSIP funds to address safety concerns. In Indiana, these funds are sub-allocated to the Louisville/ Jefferson County KY-IN Metropolitan Planning Area (MPA) for which the TPC has the authority to award. In Kentucky, these funds are managed by KYTC. In both cases, however, KIPDA staff works with the states in an effort to make highways in the region safer for not only those in vehicles, but also for bicyclists and pedestrians.

COORDINATED HUMAN SERVICES TRANSPORTATION PLAN

Another planning requirement of IIJA, the <u>Coordinated Human Services Transportation Plan</u> identifies the transportation needs of individuals with disabilities, older adults, and people with low incomes and provides strategies to meet needs and prioritize services for funding and implementation. There is also a requirement that projects and programs selected to receive funds through the Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) program must be derived from a locally developed Coordinated Public Transit Human Services Transportation Plan.

The MPO, in partnership with TARC and many non-profit agencies, developed a plan for the nine-county KIPDA region which includes Clark and Floyd counties in Indiana, and Bullitt, Henry, Jefferson, Oldham, Shelby, Spencer, and Trimble counties in Kentucky. This plan serves as a unified, comprehensive strategy for enhancing mobility. The current Coordinated Human Services Transportation Plan was updated in October 2024.

CONGESTION MANAGEMENT PROCESS (CMP)

The <u>Congestion Management Process (CMP)</u> provides a means for both contributing to congestion mitigation on a defined network and analyzing the effect of strategies toward enhancing transportation system efficiency.

Implementation of Transportation Systems Management and Operations (TSMO) strategies, such as technology, bicycle, pedestrian, and transit investments, often introduces an efficient means of reducing or managing congestion. KIPDA is in the process of updating the CMP in 2025.

INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

Technology is increasingly utilized to manage traffic, inform travelers, respond to roadway emergencies, and gather data to drive investment decisions. The TPC adopted an <u>ITS Architecture</u> that describes how emerging technology should be coordinated, along with alist of key entities involved.

O5 GOALS & OBJECTIVES

In this chapter:

- Safety
- Equity
- Economic Development
- An Effective Roadway System
- Strengthen Public Transit
- Expand Active Transportation
- A Reliable Freight Network

Performance-Based Planning and the MTP Project Scoring Process

KIPDA's transportation planning process utilizes both the performance-based planning and programming approach. Performance-based planning is used as a strategic approach using data to support investment decisions that help to achieve performance goals. Performance-based programming refers to the application of performance management within the project selection process.

As outlined in <u>KIPDA's Performance Management Plan</u>, the MPO utilizes the framework established by the FHWA and the FTA by incorporating the National Performance Measures and Planning Factors into the KIPDA planning process. Federal legislation emphasizes performance-based transportation planning and requires states and MPOs to incorporate performance measures, objectives, and targets into their planning and programming processes.

The project development process for <u>Connecting Kentuckiana 2050</u> (also refered to as the MTP) utilized data to identify areas where investments should be prioritized. As a reminder, the TIP is a subset of the MTP and therefore much of this chapter will refer to the MTP. KIPDA designed the process to connect data, resources, and performance measures and used the information to evaluate and prioritize projects in *Connecting Kentuckiana 2050*. Every project was tested against possible impacts derived from the performance measures, which carried into the project rankings.

While the exact effect of projects on each performance measure cannot be determined, understanding the potential of a project is, for now, the best case scenario for performance based planning. To do this, KIPDA designed an evaluation process to individually score each project to assess which projects best meet the following goals and objectives. These goals and objectives are a part of the performance-based planning system used in development of both the long-range plan (the MTP) and the short-range plan (the TIP) designed for the KIPDA region.

The total scoring system is based on a range of 200 points and designed to be broken down into sub-scores to better evaluate how projects will help the KIPDA MPO region to meet each of the nine goals. The resulting total score is used to highlight the project's overall effectiveness toward meeting the overall regional vision and as a guide for the TPC to determine how to award specific federally regulated funds.

The following pages expand upon each goal discussed in *Connecting Kentuckiana 2050*. These goals were used in both the <u>FY 2023- FY 2026 TIP</u> and the FY 2025 – FY 2028 TIP to be consistent with the MTP and highlight the planned projects that scored the highest and are therefore most likely to help the region.

Evaluation by Project Type

KIPDA asks sponsoring agencies to classify projects as either roadway, bicycle/pedestrian, transit, programmatic, or maintenance when submitting projects for consideration into the MTP and TIP. Due to the range in project evaluation criteria, different types of projects are generally not compared to each other. For instance:

Roadway and bicycle/pedestrian projects have some overlapping criteria in the evaluation but also some criteria only applied to the specific project type. Therefore, they are not compared directly to each other but listed separately in the following pages.

KIPDA's scoring matrix relies in large part on a project's location, so it can be difficult to effectively evaluate programmatic projects. Thus, KIPDA does not include the handful of MTP programmatic projects in this evaluation section.

A majority of MTP/TIP transit projects are capital, vehicle, or facility maintenance projects and are difficult to compare to location-based projects. High-scoring transit projects are therefore highlighted only in the region's transit specific goal. It is important to note that some roadway projects also have transit components and may not be reflected in the specific transit goal evaluation.

Maintenance projects are not scored in KIPDA's project evaluation. This is because the TPC has established that – in keeping with both federal and regional goals - maintenance is a top MPO priority. Rather than compare one maintenance project to another, KIPDA prioritizes a "fix it first" approach that assumes maintenance is needed and desirable.

GOALS

SAFETY

INCREASE SAFETY FOR ALL USERS

EQUITY

FOSTER AN ACCESSIBLE AND EQUITABLE TRANSPORTATION SYSTEM FOR ALL

ECONOMIC DEVELOPMENT

LEVERAGE TRANSPORTATION INVESTMENTS TO SUPPORT REGIONAL AND LOCAL ECONOMIC GROWTH

AN EFFECTIVE ROADWAY SYSTEM

CREATE A MODERN, INNOVATIVE, AND EFFICIENT ROADWAY SYSTEM

STRENGTHEN PUBLIC TRANSIT

EXPAND PUBLIC TRANSIT AND NON-SINGLE OCCUPANT VEHICLE TRAVEL THROUGHOUT THE REGION

EXPAND ACTIVE TRANSPORTATION

EXPAND ACTIVE TRANSPORTATION OPTIONS WITH CONNECTED PEDESTRIAN AND BICYCLE INFRASTRUCTURE

A RELIABLE FREIGHT NETWORK

SUPPORT THE RELIABLE MOVEMENT OF FREIGHT

A RESILIENT REGION

IMPLEMENT RESILIENT INFRASTRUCTURE, PROTECT ENVIRONMENTAL RESOURCES AND MINIMIZE WEATHER EFFECTS

GOALS & OBJECTIVES SAFETY

INCREASE SAFETY FOR ALL USERS

OBJECTIVE: STABILIZE & DECREASE SERIOUS INJURY CRASHES & FATALITIES

OBJECTIVE: REDUCE BICYCLE AND PEDESTRIAN RELATED CRASHES

OBJECTIVE: INCREASE SAFETY ON FIXED ROUTE TRANSIT AND PARATRANSIT

OBJECTIVE: INCREASE TRANSPORTATION SAFETY THROUGH INTELLIGENT TRANSPORTATION SYSTEM SOLUTIONS

Highest Rankings Projects: Safety

Bike/ped projects were evaluated on two primary safety factors:

- The rate of crashes involving people walking or biking over the last 10 years at the project location
- If the project intends to incorporate one of the <u>FHWA's Proven Safety Countermeasures</u> for bike/ped projects.

Roadway projects were evaluated on three primary safety factors:

- The rate of auto crashes at the project location over the last five years
- The rate of crashes involving people walking or biking over the last 10 years at the project location
- If the project intends to incorporate one of the FHWA's Proven Safety Countermeasures for roadway projects.

The next two figures feature the top scoring safety projects. There are 14 bicycle/pedestrian projects that scored 50/50 possible points and 8 roadway projects that scored over 40 out of 45 possible points.

Goals & Objectives - 63

GOALS & OBJECTIVES

FOSTER AN ACCESSIBLE AND EQUITABLE TRANSPORTATION SYSTEM

OBJECTIVE: REDUCE FOCUS ON AUTO-DEPENDENT ACCESS AND INCREASE TRANSPORTATION OPTIONS TO EMPLOYMENT, EDUCATION, AND HEALTHCARE

OBJECTIVE: MINIMIZE DISPROPORTIONATE BURDENS AND ENSURE EQUITABLE BENEFITS FROM TRANSPORTATION

OBJECTIVE: IMPLEMENT INNOVATIVE OUTREACH STRATEGIES TO REACH A BROAD COMMUNITY

KIPDA uses location-based criteria to award points to projects for equity. Both bicycle/pedestrian and roadway projects received full points if some or all of the project is in a KIPDA-identified priority area. Any transit project receives full points for equity as transit projects are especially important to carless households. As a reminder, the criteria KIPDA uses to evaluate projects are directly based on the goals and objectives outlined in the MTP, which was adopted in May of 2023. Consequently, these criteria will not be re-evaluated until the adoption of the next MTP.

The following two figures feature the highest-ranking equity projects. There are 16 bicycle/pedestrian projects and 31 roadway projects that scored all 20 equity points.

FIGURE 12A: RELEVANT BICYCLE/PEDESTRIAN PROJECTS PROJECTS: EQUITY

GOALS & OBJECTIVES

ECONOMIC DEVELOPMENT

LEVERAGE TRANSPORTATION INVESTMENTS TO SUPPORT REGIONAL AND LOCAL ECONOMIC GROWTH.

OBJECTIVE: SUPPORT ACCESS TO WORK BY MAINTAINING OR IMPROVING REASONABLE TRAVEL TIME ON THE REGION'S TRANSPORTATION INFRASTRUCTURE

OBJECTIVE: DEVELOP A SUSTAINABLE WORKFORCE THROUGH BETTER EMPLOYMENT ACCESSIBILITY AND MOBILITY OPTIONS, ESPECIALLY FOR THOSE RESIDING IN LOW-INCOME AREAS WITH HIGH UNEMPLOYMENT

OBJECTIVE: ENHANCE MULTIMODAL ACCESS TO MAJOR EMPLOYMENT CENTERS AND AREAS WITH ANTICIPATED EMPLOYMENT GROWTH

OBJECTIVE: STRENGTHEN COORDINATION BETWEEN TRANSPORTATION AND LAND USE PLANNING

Highest Rankings Projects: Economic Development

Both bicycle/pedestrian and roadway projects were evaluated on three primary economic development factors:

- Proximity to existing jobs
- Proximity to predicted job growth
- Connectivity to existing high-demand destinations

The methodology for determining these areas and destinations is explained in more detail in the MTP.

Figure 13A and **Figure 13B**, found on the next pages, feature the highest-ranking economic development projects. There are 9 bicycle/pedestrian and 12 roadway projects that score at least 39 out of a possible 45 economic development points.

68 - Goals & Objectives

Figure 13A: Highest Scoring Bicycle/Pedestrian Projects: Economic Development

GOALS & OBJECTIVES EFFECTIVE ROADWAY SYSTEM

CREATE A MODERN, INNOVATIVE, AND EFFICIENT ROADWAY SYSTEM

OBJECTIVE: MAINTAIN OR IMPROVE TRAVEL TIME ON FREEWAY AND INTERSTATE ROADWAYS

OBJECTIVE: MAINTAIN OR IMPROVE TRAVEL TIME ON ARTERIAL ROADWAYS

OBJECTIVE: STABILIZE AND DECREASE VEHICLE MILES TRAVELED

OBJECTIVE: DIRECT EFFORTS TO EXPAND FACILITIES IN SUPPORT OF ELECTRIC AND AUTOMATED VEHICLES AND OTHER FUTURE TRANSPORTATION TECHNOLOGY

OBJECTIVE: EXPLORE INNOVATIVE MANAGEMENT AND OPERATION STRATEGIES

Highest Rankings Projects: Roadway System

Roadway system projects were evaluated on five different factors to gauge their contributions toward a more modern, innovative, and efficient roadway system:

- Average Annual Daily Traffic (AADT) at the intended roadway intersection or segment to measure existing total volumes of traffic
- Travel Time Index (TTI) or Level of Service (LOS) (both measures of peak time delays) at the intended roadway intersection or segment
- If the project will enhance connectivity to high demand locations
- If the project will Improve the active transportation network
- If the project will include innovative transportation infrastructure

The next figure features the highest-ranking roadway system projects. There are 23 roadway projects that score at least 25 out of a possible 45 roadway points.

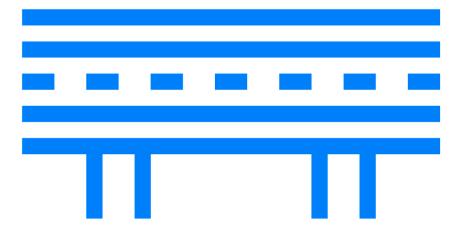

FIGURE 14: HIGHEST SCORING ROADWAY PROJECTS: ROADWAY SYSTEM

GOALS & OBJECTIVES

STRENGTHEN PUBLIC TRANSIT

EXPAND PUBLIC TRANSIT AND NON-SINGLE OCCUPANT VEHICLE TRAVEL THROUGHOUT THE REGION

OBJECTIVE: IMPROVE ACCESS TO TRANSIT

OBJECTIVE: PRIORITIZE TRANSIT SERVICE TO EMPLOYMENT, SCHOOLS, AND OTHER ACTIVITY CENTERS

OBJECTIVE: INCREASE RIDESHARING BY EXPANDING VANPOOLING, CARPOOLING, AND SIMILAR STRATEGIES

Highest Rankings Projects: Transit

Transit projects were evaluated on six different factors to gauge their effectiveness at improving transit service in the KIPDA MPO region:

- If the project will enhance connectivity and access to existing high demand destinations
- If the project will increase transit reliability
- If the project can be implemented quickly
- If the project will improve transit safety
- If the project will enhance existing service or infrastructure
- If the project will add transit service or infrastructure in a high transit propensity area

As a reminder, projects that may have transit components as part of a larger project – like dedicated lanes or bus stop improvements – were not scored as transit projects if the project sponsor classified them as a roadway or bicycle/pedestrian project. Only projects identified as primarily transit projects were evaluated with the transit scoring rubric.

Figure 15 features the highest-ranking transit projects. There are 5 transit projects in the TIP that score at least 50 out of a possible 100 transit points.

FIGURE 15: HIGHEST RANKING: TRANSIT

KIPDA ID	Project Name	Open to Public Year	Sponsor Agency	Final Project Score (Out of 200)	Transit Score (Out of 100)
New	Louisville Downtown Transit Center	2028	TARC	165	75
2799	TARC Non-Fixed Route ADA Paratransit Service	2026	TARC	119	50
2813	TARC Security Enhancements	2026	TARC	123	50
2823	TARC Purchase Two (2) 40' Buses	2026	TARC	125	50
3169	Non-Fixed Route ADA Paratransit Service	2026	TARC	100	50

GOALS & OBJECTIVES EXPAND ACTIVE TRANSPORTATION

Expand active transportation options with connected pedestrian and bicycle infrastructure

OBJECTIVE: INCREASE ACCESS TO PEDESTRIAN FACILITIES AND CONTINUITY OF THE SYSTEM

OBJECTIVE: INCREASE ACCESS TO AND UTILIZATION OF BICYCLE FACILITIES

OBJECTIVE: INCREASE OR IMPROVE EXISTING BICYCLE AND PEDESTRIAN ACCESS TO TRANSIT

OBJECTIVE: SUPPORT INNOVATIVE ACTIVE TRANSPORTATION AND SHARED MICRO-MOBILITY STRATEGIES

Highest Rankings Projects: Active Transportation

Bicycle/pedestrian projects were evaluated on four factors to gauge the level of their contribution to expanding regional active transportation:

- If the project will fill a gap in the existing active transportation network or creates a network where none currently exists
- If the project will increase bicycle/pedestrian connections to transit
- The rate of crashes involving people walking or biking over a 10-year period at the project location
- If the project will enhance active transportation connectivity to existing high demand destinations

Roadway projects were evaluated on two factors to gauge the level of their contribution to expanding regional active transportation:

- The rate of crashes involving people walking or biking over a 10-year period at the project location
- If the project includes multimodal or complete streets elements in the project

The figures on the following pages feature the highest-ranking active transportation projects. There are 14 bicycle/pedestrian projects that received at least 37 out of a possible 50 and 12 roadway projects that scored at least 18 out of a possible 20 active transportation points.

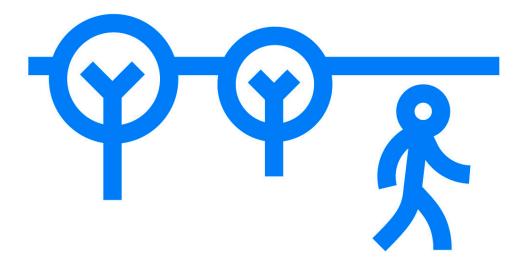

FIGURE 16A: HIGHEST SCORING BICYCLE/PEDESTRIAN PROJECTS: ACTIVE TRANSPORTATION

GOALS & OBJECTIVES FREIGHT

SUPPORT THE RELIABLE MOVEMENT OF FREIGHT

OBJECTIVE: REDUCE DELAY AND IMPROVE RELIABILITY FOR TRUCKS TRAVELING ON INTERSTATES, FREEWAYS, AND ARTERIALS

OBJECTIVE: IMPROVE TRUCK ACCESS TO FREIGHT DESTINATIONS

OBJECTIVE: SAFELY INTEGRATE FREIGHT MOBILITY WITH OTHER TRANSPORTATION MODES

Highest Rankings Projects: Freight

Roadway projects were evaluated on two factors to gauge their potential to improve the region's freight network:

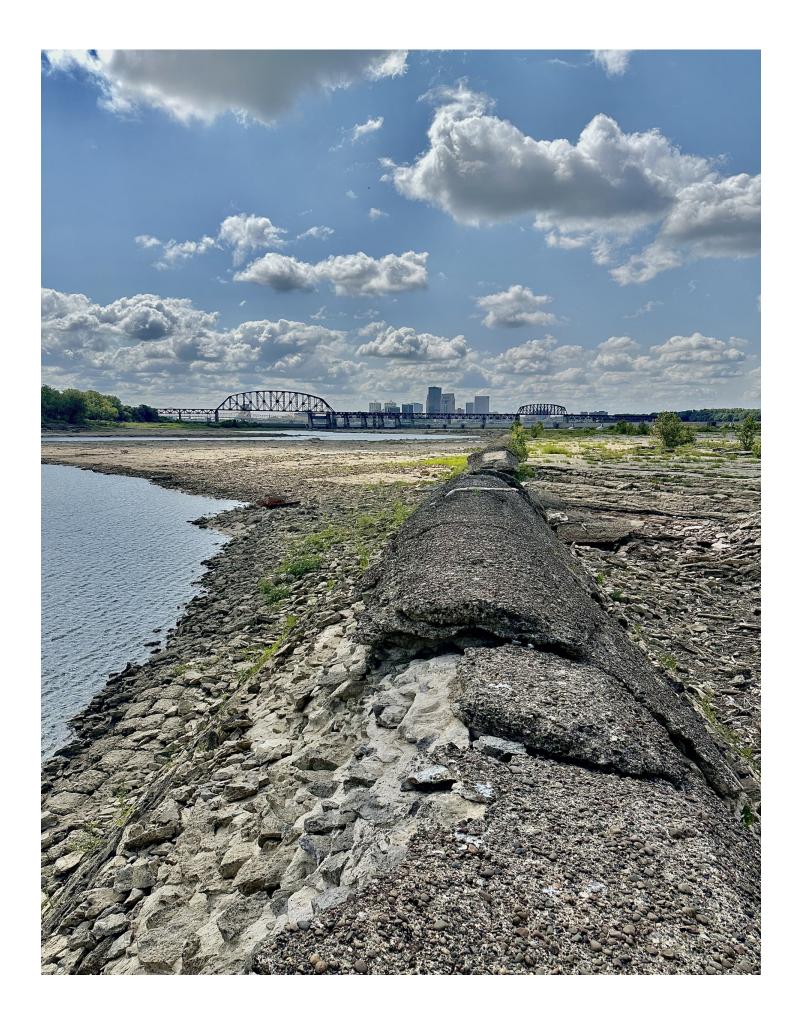

- If the project is on a Tier 1 roadway in the region's freight network (see <u>Connecting Kentuckiana 2050</u> pg. 80 for more details on the freight network roadway classification)
- Average Annual Daily Traffic (AADT) of the intended roadway intersection or segment to measure existing total volumes of traffic

On the next page, **Figure 17** features the highest-ranking freight projects. There are 15 freight projects in the TIP that score at least 9 out of a possible 10 freight points.

GOALS & OBJECTIVES A RESILIENT REGION

IMPLEMENT RESILIENT INFRASTRUCTURE

OBJECTIVE: IMPROVE PAVEMENT AND BRIDGE CONDITIONS AND ENHANCE EXISTING INFRASTRUCTURE OPERATIONS

OBJECTIVE: SUPPORT IMPROVED MODAL CONNECTIVITY IN PEDESTRIAN, BICYCLE, AND TRANSIT PROJECTS THAT CONTRIBUTE TO CLEANER AIR

OBJECTIVE: REDUCE THE PERCENT OF THE TRANSIT FLEET EXCEEDING THE USEFUL LIFE BENCHMARK AND MAINTAIN THE CONDITION OF TRANSIT FACILITIES

OBJECTIVE: INCREASE SYSTEM RELIABILITY ON FIXED ROUTE TRANSIT AND PARATRANSIT

OBJECTIVE: PRIORITIZE RESILIENCY STRATEGIES TO EXTEND THE LIFE SPAN AND FUNCTIONALITY OF THE TRANSPORTATION SYSTEM

OBJECTIVE: PRIORITIZE REDUNDANT INFRASTRUCTURE AND SUPPORT CONNECTION TO OTHER MODES TO INCREASE SYSTEM RESILIENCY

OBJECTIVE: REDUCE DISRUPTION TO TRAVEL BY LIMITING ENCROACHMENT INTO ENVIRONMENTAL, HISTORIC, NATURAL, AND CULTURAL RESOURCES

Highest Rankings Projects: Resilient Region

Bicycle/pedestrian projects were evaluated on four factors to gauge the level of their contribution to increasing regional resilience:

- If the project will increase bicycle/pedestrian connections to transit
- If the project will incorporate resilient design measures
- If the project will add to bicycle/pedestrian infrastructure in high active transportation propensity areas
- Environmental impact and emergency event mitigation

Roadway projects were evaluated on six factors to gauge the level of their contribution to increasing regional resilience:

- If the project will incorporate resilient design measures
- Average Annual Daily Traffic (AADT) of the intended roadway intersection or segment to measure existing total volumes of traffic
- If the project will enhance connectivity to high-demand locations
- If the project will improve the active transportation network
- If the project will utilize innovative transportation infrastructure
- Environmental impact and emergency event mitigation

Figures 18A and **Figure 18B**, on the following two pages, feature the highest-ranking projects for resiliency. There are 26 bicycle/pedestrian projects that received at least 15 out of a possible 20 and 13 roadway projects that scored all at least 25 out of a possible 35 points for enhancing resiliency in the KIPDA MPO region.

Goals & Objectives - 85

06 PROJECT SPECIFIC REPORTS

In this chapter: MPO Dedicated Projects Obligated Projects

MPO-DEDICATED FUNDS

As previously mentioned, the TPC, which serves as the MPO, has the authority to award funds from six programs in Indiana (CMAQ, CRP, HSIP, PROTECT, STBG, and TA) and three in Kentucky (CRP, STBG, and TA). Funds sub-allocated to the MPO from Indiana and Kentucky can only be spent on projects in each respective state. The current MPO-ded-icated programs tracking sheet can be found here.

The <u>Project Management Guidebook</u> provides a guide as to how these MPO-dedicated funds are awarded to specific projects and details how cost increases and phase shifts (i.e. project delays) are managed. For new projects seeking MPO-dedicated funds, the Project Working Group will consider the following factors when developing recommendations for TPC:

- Cost Estimate
- Project Schedule
- LPA Project or Program Advancement History
- Project or Program Cost
- Project or Program Justification
- Consideration of project or program relative to funds requested
- Non-federal match (percent of non-federal match, and availability)
- MTP Score
- Continuity / Connectivity with other TIP or MTP projects and programs
- Relationship of the proposed projects to MTP priority study areas
- Adherence to the Complete Streets Policy
- Consider how the context-sensitive design solutions meet the intent of the Complete Streets Policy, including geographic needs, population, etc.
- Potential contribution toward achieving KIPDA Performance Management Plan performance targets
- Total of funding requests relative to available funds

PROGRAMING ANALYSIS

Indiana

In Indiana, there is no ability to carryover funds from one fiscal year to the next. Also, since the allocated funding amounts are relatively low, there are no MPO-dedicated cost increase reserves. Therefore, sponsors must estimate the phase costs extremely accurately and in many cases the sponsors must contribute more local funds than the minimum federal share that is required.

Kentucky

In Kentucky, carrying funds over from one fiscal year to the next is allowable.

See **Figure 19** for Indiana and **Figure 20** for Kentucky on the next pages for a more detailed financial analysis of the MPO-Dedicated Funding Programs.

Kentucky MPO-Dedicated Funding Program

Projects Implimented and Projects Significantly Delayed

The next two figures reference projects that have previously been awarded MPO-dedicated funds by the TPC. However, it is specific to those projects that were previously programmed in the FY 2023 – 2026 TIP. Since these projects are funded with MPO-dedicated funds, KIPDA closely monitors whether they are moving forward in a timely manner.

FIGURE 21: MPO DEDICATED PROJECTS IMPLEMENTED OR UNDER CONSTRUCTION

ANNUAL LISTING OF OBLIGATED PROJECTS

KIPDA publishes an annual listing of projects obligated in the preceding year. This list is developed cooperatively by the states, public transportation operator, and the MPO. The Annual Listing of Obligated Projects (ALOP) is published as a separate document and made available for public review in accordance with the Participation Plan.

The most recent ALOP can be found by using the link on the <u>KIPDA TIP webpage</u>.

96 - Project Specific Reports

O7 AIR QUALITY CONFORMITY

In this chapter:

- Air Quality Status
- Transportation Conformity
- Regional Emissions Analysis
- CMAQ Eligibility

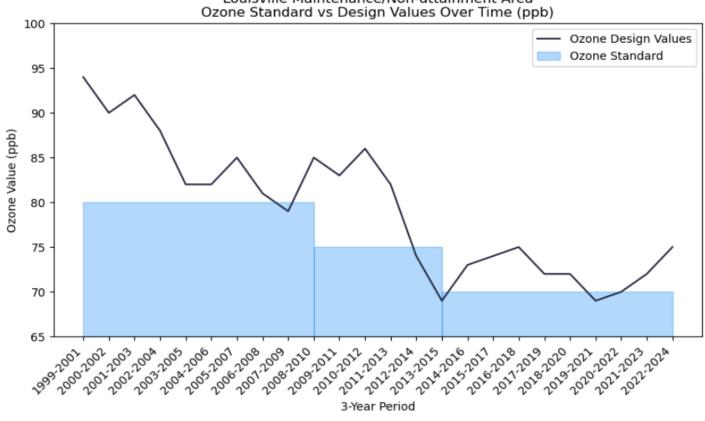

AIR QUALITY STATUS

The presence of high levels of ground-level ozone and fine particulates, specifically PM_{2,5}, have affected the region for decades, and meeting the National Ambient Air Quality Standards (NAAQS) have traditionally been an issue for the region. While air quality has steadily and significantly improved over the years, the national standards that must be met have consistently been strengthened. On-road mobile emissions are significant contributors to this problem; therefore, estimates of these pollutants and their precursors play a significant part in the regional transportation planning process. When a design value exceeds a standard, an area may be declared in nonattainment of that standard. As the graphs indicate, local design values continue to trend downward as the standards are periodically reviewed and strengthened at a similar rate.

Ozone

Figure 23 shows the design value for ground-level ozone in the KIPDA region, and the ozone standards measured in parts per billion (ppb). Presently, the KIPDA region is designated as a non-attainment area under the most recent Ozone Standard, which was established in 2015. Non-attainment areas are established when any of the air quality monitors in a region show a violation of the US EPA-established standards. The region was officially designated as non-attainment under this standard in November 2017. The EPA designated the entirety of Clark, Floyd, Jefferson, Bullitt, and Oldham counties as the ozone non-attainment area, which is consistent with past precedent. As required by the EPA, a design value is determined using data from monitors deployed regionwide. The design values shown in this graph reflect the three-year rolling average of the fourth-highest monitored reading each year. The series of readings considered for this calculation is the highest 8-hour concentration over the course of each day.

FIGURE 23: DESIGN VALUE FOR GROUND-LEVEL OZONE IN THE KIPDA-LOUISVILLE MPO

Louisville Maintenance/Non-attainment Area

PM_{2.5}

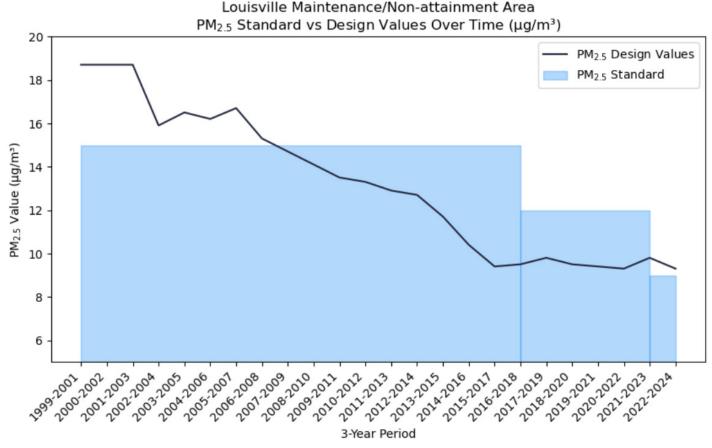

The KIPDA region has been designated as being in attainment of the previous PM_{2.5} standard, which was established in 2012. A new standard of 9 µg/m³ was adopted in 2024, recent data indicates an exceedance of the standard. A request for an exceptional event has been made to the EPA to review the impacts of the 2023 Canadian wildfires. If accepted

recent design values would likely be reduced.

Figure 24 shows the annual design value for $PM_{2.5}$ in the KIPDA region and the $PM_{2.5}$ standards measured in micrograms per cubic meter (μ g/m³).

As required by the EPA, a design value is determined using data from monitors deployed regionwide. The design values shown in this graph reflect the three-year rolling average of the annual mean monitored reading each year.

FIGURE 24: DESIGN VALUE FOR PM 2.5 IN THE KIPDA-LOUISVILLE MPO

TRANSPORTATION CONFORMITY

Transportation conformity is the established process that links transportation planning and air quality planning. For a transportation project to be eligible to receive federal funding in non-attainment areas, a project must be included in a conforming Metropolitan Transportation Plan (MTP). As a reminder, the TIP is considered a subset of the MTP so conformity is technically only applied to the MTP.

Due to the KIPDA region being designated a non-attainment area under the 2015 Ozone Standard, KIPDA must show that *Connecting Kentuckiana 2050* (the MTP) conforms to the standard by estimating and analyzing future levels of regional on-road mobile emissions.

This process is performed through a multi-step, multi-agency process. This process is established in a Memorandum of Understanding (MOU) between KIPDA and its air quality planning partners. The air quality planning partners include the air quality and transportation agencies at the local, state, and federal levels, which serve the KIPDA region.

REGIONAL EMISSIONS ANALYSIS

The first step in the regional emissions analysis involves the creation of future-year scenarios in KIPDA's Regional Travel Demand Model. These model scenarios include all projects that are expected to be open to the public by the year of the scenario, paired with land use assumptions in the form of population, household, and employment characteristics

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

for the same year. The Interagency Consultation (IAC) Group, a group that includes KIPDA's air quality planning partners, reviews and approves the planning assumptions used to model the projects.

The regional emission estimates of the ozone precursors were calculated using MOVES 4, a model that statisfies current EPA requirements. Key outputs from the KIPDA Model, including VMT and speed outputs, are among the inputs to the MOVES model. The MOVES Model also incorporates additional parameters including detailed information on the fleet of vehicles registered in the region, the fuels used, local weather/climate conditions, among others. In the KIPDA region, KIPDA staff performs the emissions modeling. The output of the MOVES Model is in the form of estimates of regional emissions of the ozone precursors, Volatile Organic Compounds (VOC), and Oxides of Nitrogen (NOx).

The regional emissions estimates of the ozone precursors are then compared to budgets of the precursors that are established in the State Implementation Plan (SIP). For more information on the Indiana SIP click here, and formore information on the Kentucky SIP click here. With the Ozone non-attainment area in this region encompassing a bistate area, the budgets are bi-state budgets that are agreed upon by the state and federal air quality planning partners. Currently, regional emission estimates are compared to 2019 baseline values for analyses prior to the year 2035. For the year 2035 and later, emission estimates are compared to the year 2035 budgets. For the MTP to be a conforming MTP, regional emission estimates for scenarios prior to 2035 must be no greater than the baseline values. For scenarios for the year 2035 and later, emission estimates must be less than the budgets established in the SIP for 2035.

Since none of the budgets are exceeded, Connecting Kentuckiana 2050 can be considered a conforming MTP. Each time Connecting Kentuckiana 2050 is amended in the future, transportation conformity must be demonstrated again, and a similar process to the one described above will be undertaken.

For further information, including the detailed Conformity Report, reference <u>Connecting Kentuckiana 2050</u>.

CMAQ ELIGIBILITY

The Congestion Mitigation/Air Quality (CMAQ) Program provides federal funding for projects that contribute to improving air quality in non-attainment or maintenance areas. The KIPDA Region has been eligible to receive funding through the CMAQ Program for many years and numerous projects have been funded with CMAQ funds. The region's current non-attainment status ensures that the region will remain eligible to receive CMAQ Funding.

Each state manages the Federal CMAQ dollars differently. Indiana sub-allocates a portion of the CMAQ dollars in Indiana to the urban areas across the state, such as KIPDA, that are non-attainment or maintenance areas. KIPDA initiates calls for potential CMAQ projects in Clark and Floyd counties and then works cooperatively with the local agencies in those counties to prioritize and award the CMAQ funding in the region. In Kentucky, CMAQ projects are awarded exclusively at the state level by KYTC. KYTC requests that potential CMAQ projects be submitted to MPOs. Those projects are then prioritized at the regional level but are awarded at the state level.

While the prioritization and award of CMAQ projects and dollars is primarily a function related to the administration of the Transportation Improvement Program (TIP), air quality improving projects were prioritized in the development of Connecting Kentuckiana 2050. Applicant projects that were thought to be CMAQ-eligible and among the project types established in the Clean Air Act that reduce on-road mobile emissions received points within the Connecting Kentuckiana 2050 project scoring and ranking structure. These projects include those projects that have the potential to improve air quality through investments in improved public transit, traffic flow improvements that do not significantly increase capacity for single-occupancy vehicles, and bicycle and pedestrian improvements, among others.

Project Listings - 101

O8 PROJECT LISTINGS

In this chapter:

TIP Development Process

Project Evaluation Process

TIP Project Listings and Maps

TIP DEVELOPMENT PROCESS

Project development for the new FY 2025 – FY 2028 TIP built on the foundation that was established with the creation of <u>Connecting Kentuckiana 2050</u> and the <u>FY 2023 – FY 2026 TIP</u> (both adopted in May 2023). The FY 2025 – FY 2028 TIP replaces the FY 2023 – FY 2026 TIP and like the previous TIP, it is considered a subset to the MTP. All projects listed in the previous TIP with phases in any of the new FY 2025-FY 2028 TIP years were automatically carried over to the new TIP. KIPDA held a Call for Projects that led to updates to projects awarded MPO-dedicated funds. Depending on need, those updates were either included to the previous TIP via administrative modification and thus carried over, or they were added at the adoption of the new TIP. In addition, staff informed project sponsors of the TIP update so that any other projects required to be included in the TIP (such as projects with federal funds outside of the MPO-dedicated program or regionally significant state funded projects) would be included and if needed. KIPDA staff frequently communicated the anticipated schedule and necessary deadlines for project updates with project sponsors at the committee meetings and through email.

For new projects and existing projects with scope changes, project sponsors were required to complete a Full KIPDA <u>Project Application</u> which is based on Survey 123 in ArcGIS. This ensured that project details like the project limits, the number of and changes to the number of travel lanes, and any MTP scoring criteria could be reviewed and documented. Other existing project changes were requested through KIPDA's Expedited Project Application. KIPDA's application process will continue after the adoption of the TIP for any project updates that the sponsors wish to request.

KIPDA staff determines which projects should be in the MTP, the TIP or both. KIPDA requires project sponsors to submit a total estimated project cost for all projects in either document and only projects with secured funding in fiscal year 2025, 2026, 2027, or 2028 are included in the FY 2025 – FY 2028 TIP. TIP projects are also listed in the MTP either directly, or in some cases listed indirectly as either a group project with an assigned group category ID or as a child project with an assigned parent project ID. (See the TIP Processes section for more on group projects and project families).

On occasion, sponsors submit funding details for phases outside of the TIP years for KIPDA's records. When applicable, this information is listed in the TIP "illustratively" (typically this occurs when administrative modifications or amendments are made). KIPDA strives to maintain consistency of project details with all sponsors, however, documenting funding details outside of the current TIP timeframe can be particularly useful when either the KYTC or the INDOT STIP is on a different cycle than the TIP.

PROJECT EVALUATION PROCESS

To be consistent with the MTP, KIPDA applied the same project evaluation process with the goals, objectives and performance measures that was used in development of *Connecting Kentuckiana 2050* for the FY 2025 – FY 2028 TIP. The MTP was not due for an update at the time of this TIP adoption. There will be an opportunity to review and potentially revise the project evaluation process in the development of the following MTP and future TIPs. For this TIP, all federally required and MPO required performance measures are included. The performance measures, along with other criteria, were used in evaluating projects for performance impacts.

The project evaluation process intends to help prioritize transportation projects for inclusion in the FY 2025 – FY 2028 TIP. The project evaluation process provides a systematic approach to scoring TIP projects. The process relies on the best available data and points of emphasis in the federal transportation bill and the MTP's goals, objectives, and performance measures. ArcGIS modeling software was utilized to evaluate projects for most of the criteria which expedited the process and provided enhanced consistency. As was the case in the last project evaluation process, some criteria required KIPDA staff to manually evaluate projects.

Apart from programs and maintenance projects, all projects were evaluated against the Common Criteria and also the Bicycle/Pedestrian, Roadway and/or Transit criteria depending on the primary project type. Projects may earn up to 100 points through the Common Criteria and another 100 points through the project's particular modal criteria (Bicycle/Pedestrian, Roadway and/or Transit) for a total of 200 points possible.

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

Below, each of the four criteria groups are explained in more detail including references for the point values.

Common Criteria for all Transportation Projects (Up to 100 points)

Economic Development: Awarded points for projects serving existing, expanding, or new employment centers. Projects are awarded points based on the existing employment within 1/2 mile of project.

<u>Future Economic Development:</u> Awarded points based on forecasted employment growth at the TAZ level. Awarded points-based location in an area of high/medium/low growth.

<u>Environmental Impact</u>: Awarded points for projects that do not intersect with significant environmental resources, as derived from KIPDA's Red Flag Inventory.

<u>Local Priority:</u> Reflects the relative importance of each project as indicated by the future sponsor. It is important that KIPDA has a sense of the local situation and preference for solutions to transportation problems. Project sponsors are asked to review and prioritize their projects. The prioritized project listings received from public agencies (city, county, state, etc.) are used to assign high, medium, or low priority.

<u>Planning Study</u>: Awarded up to 10 points for projects identified in a formal, publicly vetted corridor study, economic development plan, or comprehensive planning process completed in the last ten years. This is meant to recognize the significant overall detailed planning invested in key transportation corridors. Projects with little or no status related to a corridor study or a comprehensive plan will be scored 0 points.

Criteria for Bike and Pedestrian Projects (Up to 100 Points if This is the Primary Project Type)

Mobility and Access Portion (Up to 35 Points)

<u>Access to Destinations:</u> Transportation infrastructure should provide access to a variety of destinations and job opportunities for all types of trips and lifestyles. Project awarded points based on location in employment, commercial, and medical high-density land use clusters, and schools.

<u>Network Connectivity:</u> Fills a gap or creates a network where none currently exists. Building out local and regional networks for bicycle and pedestrian facilities is crucial in promoting these modes of travel. Projects that connect to existing networks or establish the beginnings of a new network are awarded points based on the facility type.

<u>Transit Connection</u>: Fills a gap or creates a network where none currently exists. Building out local and regional networks for bicycle and pedestrian facilities is crucial in promoting these modes of travel. Projects that connect to existing networks or establish the beginnings of a new network are awarded points based on the facility type.

Resiliency Portion (Up to 15 Points)

<u>Land Use:</u> Implementing bicycle and pedestrian infrastructure where land use and demographics are more likely to generate these modal trips is a key factor in planning for project success. Points awarded to projects in areas of higher demand propensity.

<u>Resiliency:</u> Our region is at risk of flooding from heavy rainfall and rising rivers, in addition to other severe weather events. Pedestrian and bicycle projects present opportunities to add green infrastructure that can help mitigate or adapt to flood risk. Projects will be evaluated on whether they contain green infrastructure elements.

Safety Portion (Up to 50 Points)

<u>Improvement to Safety</u>: Points are awarded based on the potential of proposed safety countermeasures to address the issues in the project area.

Safety: The average annual number of crashes in project area over a ten-year period involving bicyclists or pedestrians is used as the metric for assigning up to 10 points.

Criteria for Roadway Projects (Up to 100 Points if this is the Primary Project Type)

Mobility and Access Portion (Up to 45 Points)

<u>Average Daily Traffic or Facility Type:</u> Ensuring resources are expended on facilities that experience a large amount of traffic is a core component of ensuring mobility on the roadway network. The combination of ADT and functional classification are used as a barometer of a roadway's significance in the regional system. This combination allows roadways with high volumes to be assigned a high score even if the facility is not high on the functional classification system. A roadway must be classified as a collector or "higher" to be eligible for federal funding.

<u>Freight Volumes:</u> The efficient movement of freight is an important goal of the transportation network. Award points based on a project's location on corridors with high volumes of truck traffic or importance as first and last mile connections to freight sites.

Improves Access to Destinations: Transportation infrastructure should provide access to a variety of destinations and job opportunities for all types of trips and lifestyles. Project awarded points based on location in employment, commercial, and medical high-density land use clusters and schools.

<u>Improves Active Transportation:</u> Roadway expansion projects should be designed for multimodal use that considers the needs of bicyclists and pedestrians. The construction of new roadway capacity also provides opportunities to add new active transportation infrastructure, improve existing infrastructure, or provide maintenance to existing infrastructure.

<u>Travel Time Index (TTI) or Level of Service (LOS)</u>: Travel Time Index (TTI) compares peak period travel speed to a freeflow travel speed. TTI includes both recurring and incident conditions and is, therefore, an estimate of the conditions faced by travelers. It is calculated by dividing free-flow travel speed by peak period observed travel speed. Projects are awarded point values based on their TTI score as follows. If TTI is unavailable (collector roadways), LOS will be used.

Resiliency Portion (Up to 10 Points)

Innovation/Alternative Fuels: Project awarded points for advancing innovative transportation infrastructure, as it relates to automated vehicles, ITS infrastructure, or alternative fuel vehicles.

<u>Resiliency:</u> Our region is at risk of flooding from heavy rainfall and rising rivers, in addition to other severe weather events. Roadway projects present opportunities to add green infrastructure that can help mitigate or adapt to flood risk. Projects will be evaluated on whether they contain green infrastructure elements.

Safety Portion (Up to 45 Points)

<u>Improvement to Safety:</u> Projects should strive to correct existing safety issues while maximizing safe design for all modes along a corridor. Points are awarded based on the potential of proposed safety countermeasures to address the issues in the project area.

<u>Pedestrian and Bicyclist Safety:</u> The average annual number of crashes in project area over a ten-year period is used as the metric for assigning up to 10 points.

<u>Vehicular Safety:</u> The existing crash rate per hundred million vehicle miles (HMVM) for the project area is used as the metric for assigning up to 10 points.

Criteria for Transit Projects (Up to 100 Points if Primary Project Type)

Mobility and Access Portion (Up to 50 Points)

<u>Improves Access to Destinations:</u> Transit expansion should focus on access to a variety of destinations and job opportunities. KIPDA's high-density land use clusters will be used as the source of important destinations to serve.

<u>Reliability:</u> Reliability on expanded transit service focuses on ensuring proposed projects offer frequent service on dedicated or exclusive right-of-way or technology enhancements that improve on-time performance. These three

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

measures enhance predictability in travel times and offer a competitive advantage over automobile travel.

<u>Timing and Analysis Level</u>: Projects should have the ability to be implemented in a timely fashion. The criterion is based on the time anticipated to fund and implement the project.

Resiliency Portion (Up to 25 Points)

Land Use: Points awarded to transit expansion projects that pass-through transit-supportive housing density.

<u>Transit Project Type:</u> Points awarded based on the type of project. Types may include, but are not limited to, vehicle replacement, service support, fixed facilities such as park and ride, stations or bus barns, and vehicle expansion.

Safety Portion (Up to 25 Points)

Transit Safety: Points awarded based on how the project helps achieve the regional transit safety targets.

Recommended Projects

The projects and programs included in FY 2025 – FY 2028 TIP represent only those that have secured federal transportation funds or are considered regionally significant state and/or locally funded projects.

The subsequent list of projects and programs are displayed by state and then by primary project type. Project types include bicycle/pedestrian, maintenance, programs, and roadway. Additionally, there is just one project listing for all transit projects. The project type represents the primary scope of the project but may include other modal elements.

The details for each project were gathered during project development and represent the best anticipated improvements, cost, and timeline the sponsors could provide at the time. Each project in the TIP listing includes the sponsor, project name, description, justification, KIPDA ID, state ID, county, open to public date, air quality status, project score and when applicable the group project ID or parent project ID. Each TIP project listing also includes the TIP funding details which show the phase, fiscal year, federal funding category, federal funds, other funds and total funds.

This document includes a static map with three or four digit **KIPDA IDs** to accompany each type of project listed except for the projects that could not be mapped (such as projects that are programs and some transit projects). The KIPDA website offers a <u>GIS Data Hub</u> which includes a gallery of interactive maps. KIPDA staff maintain a <u>TIP Project Map</u> and as well as an <u>MTP Project Map</u> where the KIPDA ID, State ID (for Kentucky projects), or Designation (DES) Number (for Indiana projects) displayed in each project listing can be used to search and view the projects with the interactive map.

The projects are listed in the following order:

Indiana Bicycle/Pedestrian Improvement projects Kentucky Bicycle/Pedestrian Improvement projects Indiana Maintenance projects Kentucky Maintenance projects Indiana Roadway projects Kentucky Roadway projects Regional Transit projects Indiana Program projects Kentucky Program projects

PROJECT LISTING LEGEND

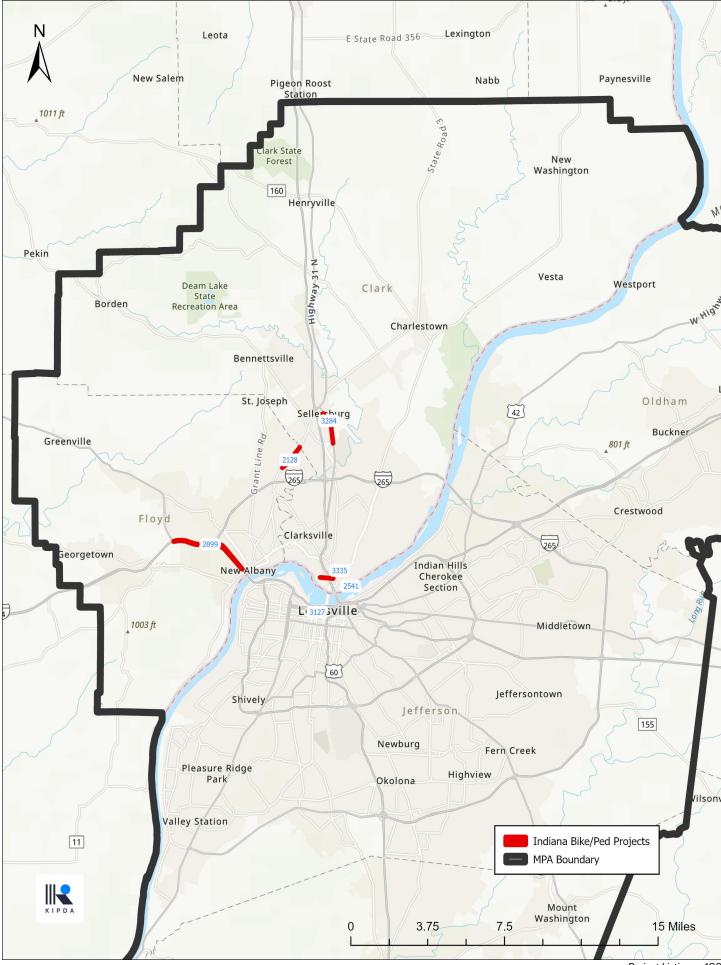

SPONSOR	The sponsor is the agency or organization that has proposed and submitted a project. In many cases, the sponsor is also the agency or organization that will complete the project or implement the program.
PROJECT NAME	The project name is a short identifying description of the project's location and/or intent.
KIPDA ID	The KIPDA ID is a unique identifier provided by KIPDA. This ID will remain with the project through its completion.
STATE ID / DES #	The State ID is each state's unique identifier. It is assigned by the respective state (when applicable).
OPEN TO PUBLIC DATE	The estimated completion date is the year the project is anticipated to be completed or initiated in certain instances such as new transit service routes.
COUNTY / COUNTIES	The county in which the project is being implemented. In some cases there may be multiple counties.
PROJECT COST	The total estimated project cost including all programmed phases and anticipated phases for the life of the project.
PROJECT SCORE	All projects have been scored using KIPDA's updated project evaluation process. This is the total score out of 200 points. Programs and maintenance projects were not evaluated using the scoring system.
AIR QUALITY STATUS	The air quality status alludes to whether the project is considered exempt or non-exempt. In general, exempt projects do not add capacity to the travel network. Non-exempt projects are generally considered capacity adding projects. There are many nuances to the definitions of exempt and non-exempt.
PARENT PROJECT ID	The Parent Project ID refers to the overarching related project which is typically listed only in the MTP. Only projects considered Child Projects will have this listing. (when applicable)
GROUP PROJECT ID	The Group Project ID is a unique number associated with each group project category and there is one for each of the two states (when applicable).
DESCRIPTION	The description is intended to define what the project is doing and when and where it may happen.
JUSTIFICATION	The justification provides additional details as to why the project or program has been identified and what issues may be addressed once complete.
TIP FUNDING	The TIP funding for each project includes the phase, fiscal year, federal funds, other/local funds, total funds and funding category associated.

INDIANA

BICYCLE/PEDESTRIAN IMPROVEMENT PROJECTS

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

Project Listings - 109

Indiana Bicycle/Pedestrian Projects

Sponsor Agency: Clark County		Project Name: Henryville Sidewalks					
KIPDA ID:	State ID/DES #:	Open to Public:	County/Counties:	Project Cost:	Project Score:		
3180	2301302	2029	Clark	\$1,350,000	44		
AQ Analysis S	AQ Analysis Status: P		Group ID:				
Exempt			2674 - Bicycle & Pe	edestrian Improvements	- Indiana		

Project Description:

The existing sidewalks in the Henryville area are crumbling and do not currently meet ADA requirements. Ramps will be added at intersections and slopes will be adjusted to help meet current ADA requirements. Extending sidewalks from the Henryville High School to the local library should also help the community.

Justification:

Sidewalks in the Henryville area do not currently meet ADA requirements. Improvements to the sidewalks including but not limited to curb ramps, sidewalk ramps and other improvements as well as extending the sidewalks to the Henryville School are planned for this project.

Phase	Year	Funding Category	,	Federal	State/Local	Total

Project Name: Jeffersonville-Charlestown Pike Improvements

KIPDA ID:	State ID/DES #:	Open to Public:	County/Counties:	Project Cost:	Project Score:
3177	2301301	2028	Clark	\$5,081,250	94
AQ Analysis	s Status: P	arent Project:		Group ID:	
Exemp	ot				

Project Description:

The Jeffersonville-Charlestown Pike project begins at the intersection of Jeffersonville-Charlestown Pike and Salem Noble Road and extend 0.8 miles to the intersection with Highway 62. The project will extend the Jeffersonville Project that begins at Utica-Sellersburg Road and extends to Salem-Noble Road. The improvements planned include an increased shoulder for bike traffic and an area for sidewalks to be added by developers or property owners fronting the project. Improved traffic flow and alternative means of travel will be offered and will help improve emissions. The multiuse path is being added to protect and help provide alternatives for local residents.

Justification:

The project is an extension of the Jeffersonville project to improve Jeffersonville-Charlestown Pike from Utica-Sellersburg Road ultimately to Highway 62. This improved road will provide an alternative to Highway 62 for local residents. The multi-use path will provide safe alternatives for residents in the area.

Sponsor Agency: Clarksville Project Name: Jeffersonville 9th Street/Clarksville Montgomery Avenue Multimodal Connection

KIPDA ID:	State ID/DES #:	Open to Public:	County/Counties:	Project Cost:	Project Score:
2541	1801597	2024	Clark	\$2,964,000	
AQ Analysi Exemp		arent Project:		Group ID:	

Project Description:

Design and construction of multimodal connection between Jeffersonville and Clarksville's Arts Districts, underneath I-65 along Montgomery Avenue and 9th Street. The design will include new sidewalks, bicycle paths, lighting, and other aesthetic amenities. Project length is 0.64 miles.

Justification:

The construction of I-65 has created a significant barrier to community connectivity between Jeffersonville and Clarksville in the Southern Indiana region. In an effort to recreate the connectivity once enjoyed by this area, both communities intend to partner in order to provide a safe, attractive bicycle and pedestrian connection for residents in each community. There are very few alternative transportation options available connecting these two communities, due to restrictions created by the interstate corridor. Citizens and visitors will have a safe route provided to them to cross between communities and Arts and Cultural Districts without using motorized transportation. in conjunction with other projects that Jeffersonville and Clarksville are undertaking, this improvement will provide an additional path to the Ohio River Greenway.

Exempt

Multi-use trail to connect County Line Road to Lewis Endres Parkway. Project is an approximately 1.5 mile pedestrian-bike trail that connects several large neighborhoods to commercial and recreational nodes along Charlestown Road. Also, the facility provides a safe mode of transportation for bike and pedestrian travel.

Justification:

This project has already been approved. This request is to split the project into Phases. Phase one will construct a section of trail from Sunset Drive to Chapel Lane and include the construction of a pedestrian bridge. Phase two which will be constructed in the future will connect Chapel Lane to County Line Road. Updated Project Justification.

Project Name: Bluegrass Commerce Park Bicycle/Pedestrian Trail Project Phase II

KIPDA ID:	State ID/DES #	•: Open to Public:	County/Counties:	Project Cost:	Project Score:
2084	5-543.00	2026	Jefferson	\$2,777,500	128
AQ Analysis Exemp		Parent Project:		Group ID:	

Project Description:

Construct a 10 foot wide multi-use bicycle/pedestrian trail along one side of Bluegrass Parkway from Watterson Trail to Campus Place and along Campus Place from Bluegrass Parkway to Plantside Drive. The trail will be constructed with concrete. Project length is 1.61 miles.

Justification:

The community including the businesses have expressed interest to provide both pedestrian and bicycle movement throughout the Bluegrass Commerce Park. So the City has been constructing a multi-use trail to connect Hurstbourne Parkway to Blankenbaker Parkway. Better connectivity is desired throughout the employment center in order to provide alternative means to the automobile.

Exempt

Project Description:

Construct a .67 miles multi-use bicycle and pedestrian trail 10 feet wide along portions of Watterson Trail, Grand Avenue, Bluebird Lane and Shelby Street as well as traversing between the Jeffersontown Public Library and the Academy of Individual Excellence School and the Good Samaritan Residential Community in downtown Jeffersontown.

Justification:

This project will greatly enhance both pedestrian and bicycle connectivity to the surrounding streets in downtown Jeffersontown as well provide enhanced access to schools, libraries, parks and places of employment. It would also provide a missing gap in the existing multi-use bicycle and pedestrian trail system already constructed that will connect a high commercial corridor to the Bluegrass Commerce Park Employment Center to the surrounding roadway network and the city's downtown.

Exem	ot		2673 - Bicycle & Pe	destrian Improvements -	- Kentucky

Project Description:

Sponsor Agency: Jeffersontown

Construct new sidewalks by filling in the gaps of existing sidewalks along the project corridor and upgrading all ADA Compliant ramps and pedestrian crosswalks along Ruckriegel Parkway between Taylorsville Road and Billtown Road.

Justification:

Citizens have voiced concerns with the gaps in the existing sidewalks along the project corridor. Given the amount of development and land use existing in the area it is important to complete these improvements at this time.

Phase	Year	Funding Category		Federal	State/Local	Total
С	2025	STBG-MPO		\$529,008	\$13,252	\$542,260

KIPDA ID:	State ID/DES #	#: Open to Pu	blic:	County/Counties	: Project Cost:	Project Score:
3109		2025		Jefferson	\$1,155,000	85
AQ Analysis	Status:	Parent Project:			Group ID:	
Exemp	t					

Project Description:

Improve pedestrian and bicycle connectivity along Taylorsville Road (KY 155) between Jeffersontown's Veterans Memorial Park (approximate MP 8.7) and Blakenbaker Parkway (KY 913, MP 8.247). The project would include a bridge over Chenoweth Run Creek and link neighborhoods with new recreational facilities within Veterans Park and provide multimodal transportation options, linking residential areas to job opportunities in Bluegrass Commerce Park.

Justification:

The project would be the first segment of the Jeffersontown to Parklands Connector, a shared use path initiative to link neighborhoods along Taylorsville Road to the Parklands of Floyds Fork (KYTC 5-3038, KIPDA 2786). The project promotes multi-modal transportation and reduces single occupancy vehicle use along the busy corridors of Taylorsville Road and Blakenbaker Parkway. Jeffersontown recently annexed the Landherr Estates and Deer Creek communities north of Taylorsville Road along Blakenbaker Parkway. There is an existing sidewalk along Blankenbaker Parkway connecting these residential areas to Taylorsville Road, but the sidewalk terminates at this intersection. This project would connect the existing sidewalk to the north of Taylorville Road, west of Veterans Park (which connects to Jeffersontown) to the existing sidewalk at Blakenbaker Parkway. This would link residents to recreational amenities at the park, to the historic Gaslight Square District in Jeffersontown, and to Bluegrass Commerce Park.

Project Description:

Widen Watterson Trail from 2 to 3 lanes from Ruckriegel Parkway to Maple Road and widen Watterson Trail from 2 to 3 lanes from Old Taylorsville Road to Ruckriegel Parkway. Project will construct sidewalks on both sides of each roadway segment along with new curb and gutters. The project will also create on-street parking along one side of each segment. The project will also include landscape enhancments as well as pedestrian street lighting.

Justification:

Citizens have expressed desire to improve pedestrian safety and circulation along this corridor as well as address congestion at the Ruckriegel Parkway/Watterson Trail intersection. An additional lane width is desired in order to provide adequate turning movement and on-street parking demands.

Exemp	ot				

Project Description:

Enhance mobility and provide safe access to community facilities along KY 1819 (Watterson Trail) from Skyview Park (MP 10.43) to Plantside Drive (MP 10.79).

Justification:

This portion of KY 1819 provides connection between "downtown" Jeffersontown and Middletown, passing through and providing access to the Bluegrass Commerce Park. The 2018 AADT was 8874 vpd, with over 12.6% trucks. A multi-use path currently exists just south of the project termini (connected to the park entrance). There are bike lanes on Plantside Drive, and the proposed reconstruction of KY 1819 from Plantside Drive to the north includes five-foot sidewalks on both sides of the road. The Jeffersontown Recreational Trail Master Plan prioritizes Watterson Trail as an important link in the overall trail system for the area.

Project Name: Reconnecting West Louisville to the Ohio Riverfront Throughout the Riverside Expressway (I-64) Corridor - Priority Segments

KIPDA ID:	State ID/DES #:	Open to Public:	County/Counties:	Project Cost:	Project Score:
3370		2032	Jefferson	\$30,300,000	133
AQ Analysis	Status: Pa	rent Project:		Group ID:	
Exemp	t	3067			

Project Description:

This project will reflect a focus area identified in the planning study that is bounded by Bank Street to the south, the Ohio River to the north, 28th Street to the west and 18th Street to the east. It would attempt to restore community connectivity by providing safe and enhanced mobility options and by providing connections to and between housing, jobs, recreation, greenspace and other important destinations. (Portion of KIPD ID 3067)

Justification:

I-643 (Riverside Expressway) was constructed in the late 1960s and early 1970s. This added to the already-existing separation of the community from the riverfront created by the U.S. Army of Corps of Engineers floodwall and levee system and the railroad lines that run along and near the Ohio River. This project will identify barriers to and opportunities for community connectivity and will develop alternative concepts to improve connections to and from the Ohio Riverfront. The project will address all modes of transportation.

Exempt				2673 - Bicycle & Pedestrian Improvements - Kentucky		

Project Description:

Construct a continuous 5-foot sidewalk on the north/east side of Bernheim Lane from Dixie Highway to Algonquin Parkway. This project will add approximately 1,150 linear feet of sidewalk. Also reconfigure the roadway from a four-lane highway to two through lanes and a center, two-way left-turn lane.

Justification:

There are no pedestrian connections on Bernheim Lane. This principal arterial connects another principal arterial (Dixie Highway) and a minor arterial (Algonquin Parkway). New sidewalks will provide safe and accessible pedestrian connections through a residential corridor to the commercial corridor on Dixie Highway and to the transit routes on Dixie Highway and Algonquin Parkway. The ADT of 4,800 makes this corridor a prime candidate for a road reconfiguration to calm traffic and improve safety for all users.

AQ Analysis Exemp		Parent Project:		Group ID:	

Project Description:

Construct a continuous 5-foot sidewalk where none currently exists and rehabilitate existing sections of sidewalk on the north side of Crums Lane from Hartlage Court to Dixie Highway. Construct and/or rehabilitate a continuous 5-foot sidewalk on the south side of Crums Lane from North Lane to the existing sidewalk at the edge of 2112 Crums Lane. This project will add and/or rehabilitate approximately 1.1 miles of sidewalk.

Justification:

There are limited pedestrian connections on Crums Lane and they are often not ADA-compliant and in poor condition. This minor arterial connects a principal arterial (Dixie Highway) to a primarily residential corridor. New sidewalks will provide safe and accessible pedestrian connections to the commercial corridor and transit route along Crums Lane and Dixie Highway. A second phase to extend the sidewalk to Cane Run Road will be proposed in the near future.

AQ Analys	is Status:	Parent Project:		Group ID:	
Exem	ipt	1857			

Project Description:

Construct approximately two miles of new 10-12 foot wide asphalt/concrete shared use path through McNeely Lake Park. The first phase of the new shared use path will connect the recently constructed Loop path at Cedar Creek Road on the southeast side of the park to the existing park path at the west side of the McNeely Lake dam on the north side of the park. This segment of the Louisville Loop in McNeely Lake Park will include a new bridge over the lake at the dam spillway area and a trail head near the east end of the new path. The second phase of the new shared use path will connect the dam spillway area with Copper Chapel Road along the lake. This segment will include a new bridge over the lake near McNeely Lake Park Road.

Justification:

McNeely Lake Park is a major urban park located in the southern part of Louisville which is experiencing a rapid transition from primarily agricultural to low and medium density residential land uses. As Louisville continues to grow in this area, there is a need for better connectivity and accessibility from both existing and approved new neighborhoods to the recreational amenities in the 746-acre park which includes athletic fields, tennis and basketball courts, a playground, and extensive path and trail system used by pedestrians, cross-country teams and others. The 100-mile Louisville Loop is a shared use path planned to traverse McNeely Lake Park as it moves across the southern part of Louisville from the Jefferson Memorial Forest to the Parklands of Floyds Fork connecting neighborhoods, schools, work places and other community facilities.

Completing the ORLT will allow non-motorized travel from downtown Louisville to southwest Jefferson County. This project will complete the second phase of the ORLT by construction a 2.2 mile segment of the shared use path in west Jefferson County near the Ohio River and a rest area overlooking the Ohio River. When all phases of the trail are completed, it will link southwest and west Jefferson County to the RiverWalk Trail that runs from near Chickasaw Park to downtown Louisville and the trails from east to the downtown area. This project will provide a valuable link for non-motorized travel in the Louisville Metro area, connecting neighborhoods while providing access to commercial and opportunities.

Project Description:

Design and construct an accessible shared-use path system, including amenities; and make improvements to portions of an existing shared-use path that connects the Big Four Bridge to Caperton Swamp. This corridor is approximately 3.5 miles of the 100+ mile Louisville Loop.

Justification:

The Ohio River Valley Northeast corridor of the Loop will provide an accessible shared-use path system to allow pedestrians and bicyclists to safely connect from neighborhoods to parks, schools, workplaces, and other community facilities on mostly off-road facilities. It will provide safe alternative transportation routes for pedestrians and bicyclists such as younger children and families who prefer not to ride on the road. On-street bike facilities will also be incorporated where possible to accommodate more experienced riders who prefer to ride on roadways, because the Loop intends to serve all categories of bicyclists.

Project Description:

Rehabilitate existing sidewalks and ramps to meet ADA-compliance, improve their condition, and remove barriers to pedestrian accessibility in Metro Council Districts 1, 2, 3, 4, 5, and/or 6.

Justification:

This project will maintain the existing system in a state of good repair, remove barriers to accessibility, improve modal choice, and enhance pedestrian safety.

Louisville Metro has evaluated the condition of over 1,800 linear miles of sidewalks and has determined that over \$60M is needed for these repairs. For this project, sidewalk rehabilitation was prioritized with the following criteria:

- I. Where entire blocks of sidewalks are rated the worst;
- 2. Within Environmental Justice (EJ) or Justice 40 areas;
- 3. Within areas with high concentrations of households with no vehicles available;
- 4. Within areas with a high number of pedestrian crashes; and
- 5. Within close proximity of schools.

Based upon this criteria, six of 26 Council Districts are to be prioritized: I, 2, 3, 4, 5, and/or 6.

Project Description:

Sponsor Agency: Louisville Metro

Install new ADA compliant 5' sidewalk along Stony Brook Drive from Stara Way to Kirby Lane. Project length is 0.284 miles.

Justification:

Complete pedestrian connectivity. The project will provide a newly formed pedestrian connector from one major arterial (Bardstown Road) to another major arterial (Taylorsville Road). Louisville Metro has recently filled in some of the smaller gaps along Stony Brook Drive with new sidewalk connections throughout this major residential area.

Project Description:

Construct streetscape and safety improvements on Muhammad Ali Boulevard (from the Shawnee Expressway to 30th Street) and on Market Street (from the Shawnee Expressway to 30th Street). Improvements will include bike and pedestrian facilities, green infrastructure, and traffic calming measures (especially near the railroad underpass).

Justification:

Improve safety for all modes of transportation, improve connectivity in a neighborhood divided by poor infrastructure. Streetscape improvements will transform the space into an attractive urban space that can serve all modes of transportation. The design should accommodate and enhance the variety of properties in the neighborhood, including housing, retail, restaurant, manufacturing, and office uses.

AQ Analysis Exemp		Parent Project: 327		Group ID:			

Project Description:

A new section of 10' wide shared use path was constructed with the Commerce Parkway Extension project which terminates on Mattingly Road. This project will continue the 10' shared use path along Mattingly Road and then south towards I-71 along Old LaGrange Road to the existing pedestrian bridge over I-71 at Exit 18. It will also extend north from the intersection with Mattingly Road along Old LaGrange Road to the intersection with KY 146.

Justification:

This trail will provide the needed connection to the existing pedestrian bridge over I-71 and move forward Oldham County's overall greenways plan to connect from LaGrange to Jefferson County. Currently there are no facilities on Mattingly or Old LaGrange Road separating vehicular traffic from pedestrians and cyclists.

AQ Analysis S	tatus: F	Parent Project:		Group ID:
Exempt			2676 - Roadway & Bridge	Preservation & Rehabilitation - Indiana

Project Description:

Clark County Bridge 413 is located over abandoned railroad tracks that have been removed and converted to a pedestrian path. The bridge will be rehabilitated with a rigid deck overlay and reinforced concrete bridge approach slabs. Following construction, Clark County will relinquish the structure to the Town of Clarksville.

Justification:

The Clark County Bridge 413 is located on Brown's Station Way over an abandoned CSX line. Brown's Station Way is classified as a freeway. The latest round on inspections identified the surface of Bridge 413 as "poor" and improvements were recommended. According to the latest bridge design codes a bridge located on a freeway must have 8-10 foot shoulders on either side of the throughway. Bridge 413 does not have shoulders. Any improvements to the bridge should include adding shoulders to the bridge.

Project Description:

Replacement of Bridge 51 over Silver Creek and reconstruction of approaches on Blackiston Mill Road. Total project length is approximately 0.312 miles.

Justification:

The proposed replacement bridge will be approximately 250 feet long, with 700 foot approaches. Bridge 51 carries Blackiston Mill Road over Silver Creek and currently serves as a critical link between the City of New Albany and the Town of Clarksville. The bridge structure itself is the responsibility of Floyd County, with the northern approach being in the City of New Albany and the southern approach in the Town of Clarksville and Clark County. In our 2018 Bridge Inspection Report, Bridge 51 scored a 39.2 Sufficiency Rating.

Project Description:

Pavement patching on I-265 from I-65 to 0.69 miles west of SR 62 (ORB O&M Limit). This will be constructed in FY 2028.

Justification:

This section of SR 265 is an urban interstate with 4 lanes approximately 12 ' wide, inside shoulders approximately 4' wide, and outside shoulders approximately 10' wide on average. This road section had a concrete pavement restoration project completed in 2019. The concrete slabs are faulting and rocking in multiple locations, which is causing the pavement to rapidly deteriorate. An emergency patching contract is scheduled for FY 2023 to help reduce the chances of this pavement failing before the pavement replacement project is completed. The purpose of this project is to reset the life of the failing pavement through replacement. The new pavement should be designed to last at least 12 years before a preventative maintenance treatment is needed.

Project Description:

Bridge deck overlay on I-265 EB bridge over Coopers Lane, 0.28 miles east of I-65. This will be constructed in FY 2028.

Justification:

The purpose of this project is to correct the deficiencies in the wearing surface and deck to help further protect the structure and extend the service life of the bridge and to improve the steel beam paint coatings to extend the service life of the steel beams. The project need is based on the current condition of the structure elements and notable deficiencies in the wearing surface, deck, joints, beams, and approach slabs. Transverse cracks are present in both approach slabs. The west approach slab has two patches, the east approach has one patch.

Project Description:

Bridge deck overlay on I-265 EB bridge over Lick Run, 0.23 miles east of US 31. This project will be constructed in FY 2028.

Justification:

The purpose of this project is to correct the deficiencies in the wearing surface and deck to help further protect the structure and extend the service life of the bridge. The project need is based on the current condition of the structure elements and notable deficiencies in the wearing surface, deck, joints, beam ends, and approach slabs. There is one small spall in Beam #7 span C at the south east end. It appears to have happened during placement of beam during construction. There are minor cracks in a few curtain walls, and minor diagonal hairline cracks in a few of the beam ends at both abutments. Beam end I has a diagonal crack and a small spall at Abutment I. This bridge has spread footings, NO piles. The footings are set in rock with riprap. There are minor cracks with efflorescence in the back wall. This bridge has been determined to be Scour Critical due to the footings being constructed in erodible shale.

Project Description:

Bridge painting rehabilitation at I-265 EB ramp over I-65 to I-65 NB, 02.50 miles east of SR 311.

Justification:

The purpose of this rehabilitation is due to the decks transverse cracks and map cracking with one spall in span B in the deck underside. Three moderate size wet spots under the spalls in the wearing surface. Shrinkage cracks in copings and parapets. Cracking in the wearing surface. The concrete patches from previous repair still look good.

Project Description:

Pavement replacement on I-265 from 0.36 miles west of I-65 to I-65. This project will be constructed in FY 2028.

Justification:

This section of I 265 is an urban interstate with 4 lanes approximately 12 ' wide, inside shoulders approximately 4' wide, and outside shoulders approximately 10' wide on average. This road section had a concrete pavement restoration project completed in 2019. The concrete slabs on the adjacent section to the East (PK 50103) are faulting and rocking in multiple locations, which is causing the pavement to rapidly deteriorate. Some patching has already been necessary on the Eastbound ramp to 165, and an emergency patching contract is scheduled for FY 2023 to help reduce the chances of this pavement failing before the pavement replacement project is completed. The purpose of this project is to reset the life of the failing pavement through replacement. The new pavement should be designed to last at least 12 years before a preventative maintenance treatment is needed.

Project Description:

Bridge thin deck overlay on I-65 Ebenezer Church Road bridge over I-65 NB/SB, 04.46 miles south of SR 160.

Justification:

The project need is based on the current condition of the structure elements and notable deficiencies in the wearing surface. This bridge received a superstructure replacement in 2015 and has not received a wearing surface treatment to date. There are minor transverse and a few longitudinal cracks in the wearing surface that could benefit from additional protection through a preventive maintenance wearing surface treatment.

Project Description:

Bridge thin deck overlay on I-65 NB bridge over Brownstown Road, 02.03 miles north of SR 160.

Justification:

"The project need is based on the current condition of the structure elements and notable deficiencies in the wearing surface. This bridge was built in 2016 and has not received a wearing surface treatment to date. There are minor hairline cracks in the wearing surface that could benefit from additional protection through a preventive maintenance wearing surface treatment. This structure will be widened with upcoming ATL project and the new portion will need to have a polymeric overlay installed as well."

Project Description:

Small structure paved invert on I-65 0.06 miles north of SR 311 at the intersection with the I-65 NB ramp.

Justification:

"The purpose of this project is to correct the deficiencies in the structure to extend the service life of the small structure. The project need is based on the current condition of the structure elements. The culvert has several locations of complete section loss in flowline. There is also debris at the outlet end of pipe and is causing water to be held in pipe along with sediment."

Project Description:

Small structure pipe lining 5.66 miles north of SR 311 on I-65.

Justification:

The purpose of this project is to correct the deficiencies in the structure to extend the service life of the small structure. The project need is based on the current condition of the structure elements. There is significant section loss, corrosion, and pitting throughout the invert of the structure. These perforations and section loss in the flow line could eventually lead to material being pulled from above and impact the roadway above through the presence of voids under or adjacent to the pavement.

Project Description:

Small structure replacement on SR 160 bridge over Guernsey Creek, east of SR 60. This will be constructed in FY 2028.

Justification:

The purpose of this project is to correct the deficiencies in the structure in order to extend or reset the service life of the asset. The project need is based on the current condition of the structure elements. The bottoms of the channel beams have horizontal cracking with efflorescence. Beams #2 and #3 are cracked with heavy efflorescence and Beam #1 is spalling at the downspouts. There are spalls and staining throughout the beams and there is evident leaking and efflorescence between each channel beam. The abutments have vertical cracks above the weep holes and the west abutment below Beam #8 has a 2' x 3' spall. In addition, there are spalls and staining on the south wingwalls.

Bridge thin deck overlay on SR 265 Utica-Sellersburg Road bridge over SR 265 EB/WB, 00.83 miles east of SR 62.

Justification:

The purpose of this project is to protect the existing deck with a preventative maintenance wearing surface treatment to help extend the service life of the bridge deck. The project need is based on the current condition of the structure elements and notable deficiencies in the wearing surface. This bridge was built in 2015 and has never received a wearing surface treatment to date. There are minor cracks throughout the wearing surface that could benefit from additional protection through a preventative maintenance wearing surface treatment.

Project Description:

Replace small structures and drainage in/around SR 60 at RP 58+32 which is 1.51 miles west of SR 311.

Justification:

The purpose of this project is to correct the deficiencies in CLV 60-010-58.21 in order to extend or reset the service life of the asset. The project need is based on the current condition of the structure elements. The barrel invert is rusted, and the roadway is sinking and cracking above the pipe. The embankment on the inlet end is eroding, and there is debris in the flow line on the outlet end. This pipe is 24".

Project Description:

Bridge deck overlay over Muddy Fork 4.70 east of SR 335.

Justification:

The purpose of this project is to correct the deficiencies in the wearing surface and deck to help further protect the structure and extend the service life of the bridge. The project need is based on the current condition of the structure elements and notable deficiencies in the wearing surface, deck, joints, and approach slabs. This bridge was built in 1995 and has never received a wearing surface treatment to date. There are several small concrete patches visible in the wearing surface and there are several patches and cracks in the concrete bridge approach slabs. The east joint is partially filled with debris and the bridge would benefit from the installation of semi-integral abutments to eliminate the joints.

Sponsor Agency: New Albany Project Name: Charlestown Road (from Hedden Court to Genung Drive)

KIPDA ID:	State ID/DES #	t: Open to Public:	County/Counties:	Project Cost:
2390	1700727	2028	Floyd	\$2,541,873
AQ Analysis S Exempt	Status:	Parent Project:		Group ID:

Project Description:

The project begins at Hedden Court and proceeds northerly for 0.31 miles to Genung Drive. The project involves the construction of curb and gutter with sidewalk and a storm sewer system. 6' wide attached sidewalks are planned. The pavement would be milled overlaid/widened to provide a maximum of 33' of pavement width. The pavement width will provide one lane in each direction with a two-way left turn lane. The project is likely to involve phase construction with the shifting of traffic. The existing paved travel lanes/shoulders allow for traffic to be shifted while maintaining a safe distance to work zone for storm sewer construction, curb and gutter and sidewalk construction. The Project includes the following Phases: 1. Preliminary Engineering/Right-of-way Engineering; 2. Right-of Way Acquisition; 3. Utilities; and 4. Construction. The Project provides connections to an Elementary School, a N-hood Center, urban residential neighborhoods and nearby commercial and industrial uses.

Justification:

The City has constructed a 3-lane section and sidewalks along most all of Charlestown Road with the exception of this 1,600+' section lying between Hedden Court and Genung Drive This final section of Charlestown Road lies in a fully urbanized area and includes nearby Fairmont Elementary and the Fairmont (Rauch) Neighborhood Center. Much of this corridor lies in a HUD-designated lower income area and is identified as a KIPDA Title VI-EJ Area. Several years ago, the City developed a neighborhood park for Fairmont Elementary School and fully rehabilitated the neighborhood center using CDBG funds. Charlestown Road Improvement including the provision of sidewalks is listed in the City's Comp Plan Year 2020. This segment is also listed as #14 on the KIPDA Region's Top 20 IN High Crash Segments and is also listed as a KIPDA bike/ped Priority Corridor. This is a compelling segment to provide sidewalks and to provide for left-turning vehicles.It benefits low income households and improves ADA accessibility.

AQ Analysis	Status:	Parent Project:			Group ID:	
Exemp	t					

Project Description:

Phase I - Reconstruct as a two lane road (no additional lanes) from Grantline Road to just west of Klerner Lane intersection including new full depth pavement section, stabilization of adjacent hillsides to arrest slides, slightly narrower reconstructed travel lanes, curb/gutter/drainage system installation, and provision of sidewalks on each side separated from the curb/gutter by a 5' grass strip.

Phase II - Klerner Lane to Charlestown Road is forthcoming and will include the same improvements as above. A new intersection control at the Klerner Lane intersection will be part of this phase, including new crosswalks.

Justification:

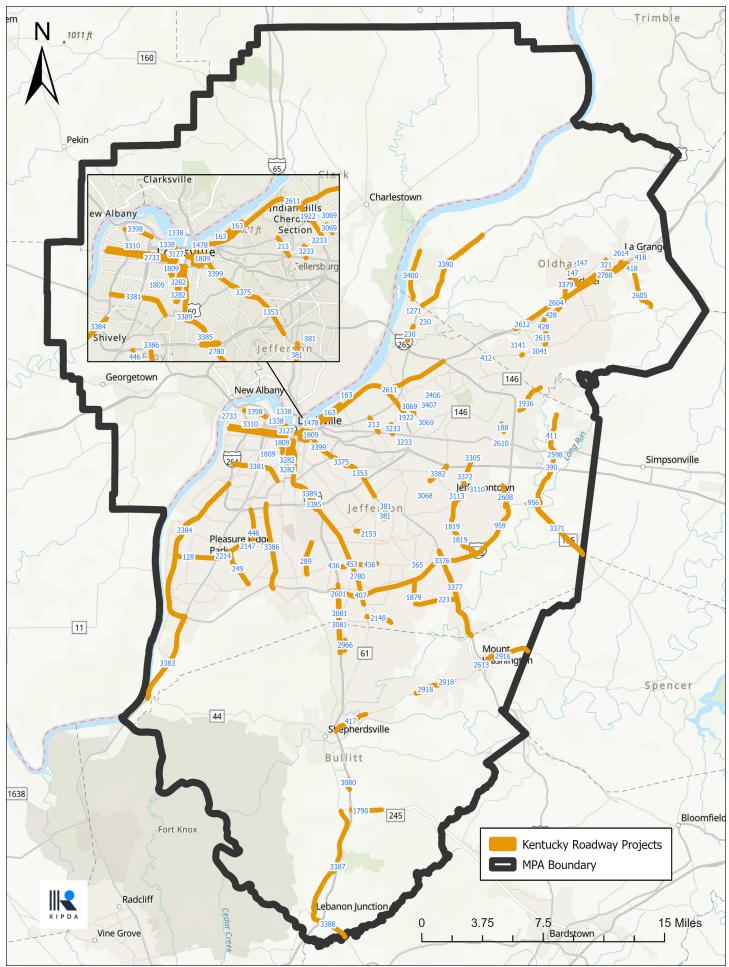

Where Mount Tabor Road is very near Rail/Slate Run Creek, this project will preserve the road by stabilizing the creek embankments and to continue to provide vehicular access to the elementary school at Mount Tabor Road and Grantline Road and shopping areas at each end of Mount Tabor Road. Sidewalks will provide pedestrian access for the first time along this road. Travel lane width will be slightly reduced. This project will add a school flasher, upgrade the signal at Grant Line Road, and add audible pedestrian signals.

Project Description:

Landslide repair on KY 524 (Westport Road) from Junction US 42 northwest, 1.0 mile. (2002BOPC) (Not required). CHAF ID IP20150467.

Justification:

The purpose of this project is to improve safety and reliability of KY 524 (Westport Road) from US 42 to 1/4 miles south of Smith Lane. This project is needed because there has been an ongoing landslide issue on KY 524 (Westport Road) from US 42 to 1/4 miles south of Smith Lane. Maintenance addresses the problem each year with band-aid approaches including driving pilings, adding new rip rap, and replacing guardrail that slides down the slope but a more permanent fix is needed requiring funding outside of the maintenance budget. Correction of the landslide will maintain the reliability of the network.

FY 2025 - FY 2028 TRANSPORTATION IMPROVEMENT PROGRAM

Sponsor Agency: Cla	ark County	Project Name: CR 31	l and Sellersburg Improveme	ents	
KIPDA ID: 3364	State ID/DES #:	Open to Public: 2030	County/Counties: Clark	Project Cost: \$2,100,000	Project Score: 33
AQ Analysis Non-Exer		Parent Project:	2676 - Roadway & Bridge	Group ID: Preservation & Rehabil	itation - Indiana

Project Description:

Corridor improvements will extend along CR 311 from SR 60 to US 31 in Sellersburg. Project will add sidewalks, a bike path and a center turn lane to provide safe traffic/transportation alternatives and improve overall safety in the area.

Justification:

KIPDA Funded Corridor study recommended a center left turn lane for the CR 311. Sellersburg has asked for sidewalks and bike path to provide safe alternative options for residents. Sellersburg is moving most of their town center options to this part of Sellersburg and are requesting the County to help improve the area for their residents.

Exempt

Project Description:

This project will enhance the overall capacity of the Memphis Blue Lick Road and the surrounding area, from Crone Road near the I-65 Interchange to the existing Champions Point S/D, 2+ miles to the west. There are potentially four intersections that must be enhanced (one is an INDOT interchange at I-65); potentially two bridge improvement structures and several small structure crossings that will need to be improved along with the roadway widening for the area. The roadway widening shall include pavement drive lane expansion and improved paved shoulders. Bike paths will also be considered for this project.

Justification:

This area is experiencing significant growth. To date there are 6 residential developments that have been platted with over 2500 new residential lots already approved and significantly more potential for the area. Vehicle counts in the area were completed in 2013 and ranged from 800-2000 AVD. new vehicle counts were completed in 2023, and the numbers have increased to 8000-9000 AVD at locations along the Memphis Blue Lick corridor. Residents in the area are concerned with the growth occurring and the potential for new growth in the currently undeveloped areas.

AQ Analysis	s Status: Pa	rent Project:		Group ID:	
Non-Exe	mpt				

Project Description:

Improve safety, improve multi-modal connectivity, and reduce congestion along Billtown Road (CS-1720H) from Ruckreigel Parkway (MP 0.000) to Watterson Trail (MP 0.165). Improve access and multi-modal connectivity from Billtown Road to Eastview Avenue. The project includes the 3lane widening of existing Billtown Road between Ruckreigel Parkway and Watterson Trail, and the addition of curb and gutter and sidewalks along both sides of the road. The project also includes the extension of existing Eastview Avenue between Billtown and Taylorsville Road, where some segments of narrow roadway and right of way already exist. The Eastview extension will be a 2-lane curb and gutter roadway with sidewalks and will help to establish improved access and connectivity for the new Jeffersontown Police Station to be completed in 2023.

Justification:

The project helps to complete Jeffersontown's downtown transportation plan and establish additional points of system access and connectivity, by linking Taylorsville Road and Billtown Road, as well as a linkage to the existing dead-end portion of College Avenue in between. The extension is most critical to provide enhanced access to the new police station at the corner of Neal and Taylorsville Road and will open up access to the south.

The project supports the City's goal to provide complete streets, through the inclusion of sidewalks along each side of both Billtown and Eastview. Presently, there is a narrow sidewalk, in poor condition, and with no vertical curb separation from the road, along one side of the Billtown corridor.

The Eastview extension crosses a 2+ acre vacant parcel owned by the City. Thus, the right of way acquisition costs will be limited, and the project will help to create economic development opportunities to support the future land use plan for the vacant property.

AQ Analysis Status: Parent Project: Non-Exempt

Project Description:

Improve capacity, connectivity, and multi-modal safety along Galene Drive (CS-1010H) from Maple Road (MP 1.134) to Bluebird Lane. The project includes realigning Galene Drive/Sprowl Road, and extending this connection east, widening the collector roadway curb and gutters, and adding sidewalks and bicycle facilities. Project will include turning movements and signalization as warranted.

Justification:

The project includes a new roadway, minor roadway widening, and intersection improvements to accomplish multiple transportation goals for the City of Jeffersontown. The realignment of the Galene/Sprowl intersection with College Dr addresses a poorly configured offset intersection where vehicular and pedestrian traffic safety at the adjacent Tully Elementary School has long been an issue. The realignment of this critical intersection is the primary focus of the project west of Taylorsville Rd. East of Taylorsville Rd, the project serves as a critical new connector, providing multiple linkages to the local transportation system at Shelby Street and Bluebird Lane which both connect south to Watterson Trail, and at residential deadend streets of Valley and Pelham, which both connect north to Grand Avenue. In addition to multi-modal connectivity, this eastern portion of the corridor also provides for some areas of economic development opportunities which will also serve to benefit the community.

3019	2301311	2030	Clark	\$5,000,000	131			
AQ An	alysis Status:	Parent Project:		Group ID:				
E	xempt							

Project Description:

The project is a complete overhaul of Stansifer Avenue from Akers Avenue to South Clark Boulevard. The roadway will have new landscaped medians, curb and gutter, the addition of on-street parking, narrowing of the lane widths and drainage improvements. The project will also include pedestrian sidewalk upgrades and widening to at least 5' and designated bike lanes.

Justification:

Stansifer Avenue is directly off of I-65 and is a key exit for the Town's South End Redevelopment, as well as Orgin Park. The Town recently built a new Fire Station on Stansifer Avenue and is working to redevelop the area. Stansifer Avenue is seen as one of the Gateway's to the Town. It will provide main access to two large development ares in Town. However it is unsafe. The lanes are almost 20 feet wide in some areas, which leads drivers to think that there are two lanes, when there is only one. This causes confusion and can lead to unnecessary accidents. The roadway also lacks parking and drainage. It needs improvement across the board.

3367	2401834	2031	Floyd	\$3,336,344	80
AQ Analysis		Parent Project:		Group ID:	
Exemp	ot				

Project Description:

Project will replace existing roadway on Baylor Wissman Road from Brookstone Court to Bridge 38 to widen lanes to 11 feet in each direction, add 2-foot shoulders with 1-foot aggregate. Additional safety measures including edge striping and curve notices will be included among other potential improvements.

Justification:

Crash data and a recent Thoroughfare Study indicated run off road crashes on this roadway. The development of a large subdivision in the Town of Georgetown that will utilize this roadway will increase traffic volume and likelihood of additional incidents.

2943	2000288	2029	Floyd	\$3,597,737	91
AQ Analysis	s Status: F	arent Project:		Group ID:	
Non-Exe	empt				

Project Description:

Interchange modification at ramp junctions with Spring Street, including Spring Street from 5th Street to State Street and Spring Street from 5th Street to Washington Place.

Justification:

The City of New Albany is evaluating the effects of converting Spring Street from one-way operation to two-way operation between 5th Street and State Street. Clark Dietz was hired to develop proposed lane configurations on Spring Street to accomplish the conversion and to perform a traffic capacity analysis of the Spring Street corridor to determine the effects of the conversion on existing traffic operations. This traffic capacity analysis evaluates three scenarios along the Spring Street corridor. While the proposed one-way to two-way conversion of Spring Street will redistribute traffic within the existing traffic network, the surrounding intersections will still operate efficiently if the recommended signal timing, cycle length, and storage length adjustments are incorporated. With these adjustments incorporated, the LOS for the existing intersections will not be negatively impacted, and in most cases will be improved compared to the existing conditions.

Widen I-71 from four to six lanes from KY 329 (MP 14.1) to KY 393 (MP 18.0). (16CCN). Project length is 3.9 miles.

CHAF DESC: Widen I-71 from four to six lanes from KY 329 (MP 14.1) to KY 393 (MP 18.0). (16CCN) CHAF ID: IP20160192.

Additional Considerations: Widen I-71 from 4 to 6 lanes from KY 329 to KY 393.

Justification:

The Purpose of the I-71 widening and reconstruction is to address the capacity deficiencies and operational issues that currently characterize the existing corridor and provide increased efficiency and safety for the traveling public. It will serve through traffic on I-71, as well as local users traveling to and from the Louisville Metro and Crestwood/Buckner areas.

CHAF Need: The Needs being addressed by the proposed I-71 project are based on the following facts: Increasing traffic volumes have resulted in traffic congestion and poor traffic flow characteristics. In 2009, the Average Daily Traffic was near 56,600 vehicles per day (vpd). In 2015, the traffic volume has increased to approx. 61,900 vpd. By 2040, those numbers are forecasted to increase to around 80,000 vpd. Traffic projections illustrate continued growth in traffic volumes. This forecast takes into account the recent opening of the East End Bridge from I-265/KY 841 in Kentucky north to I-265 in Indiana.• I-71 has roadway deficiencies and poor traffic operational characteristics. The life span of the pavement surface and bridges warrant they be replaced within the foreseeable future, regardless of the transportation demands; the clear zones along with the inside shoulder width are less than desirable.• Driver crash rates are notably high along this section of I-71.increase to around 80,000 vpd.

Project Description:

Improve safety and reduce congestion on I-71 from I-264 to I-265, including the following sound barrier walls. A sound barrier wall on the north side of I-71 from MP. 7.5 to MP 8.7 for approximately 6,400 feet. A sound barrier wall on I-71 N from near Glenview Avenue to just north of Lime Kiln overpass for approximately 2,700 feet.

Justification:

Increase safety for all users. Manage and reduce roadway congestion where appropriate. Ensure timely and efficient movement of freight within, departing, and entering the region.

Project Description:

Intersection improvement going to a roundabout at SR 60 and CR 311.

Justification:

The purpose of this project is to reduce the number of traffic crashes being experienced at this location, in particular the rear end, left turn, and right-angle crashes. Using HAT 3 as the analysis tool the 129 crashes resulted in a 4.01 lcc crash severity value. The crash frequency value (lcf) is 6.68. The need for this project is to provide a geometric improvement to the intersection which will provide sufficient capacity and reduce these rear end, left turn and right angle crashes going forward to allow this intersection to operate at a more acceptable overall safety operating condition.

Project is an intersection improvement that will take place over 6.25 miles of SR 62 from 0.39 miles north of SR 265 to SR 3.

Justification:

The need for the project is to improve access, safety, and traffic operations due to increasing growth and congestion along SR 62. Existing developments built along the corridor in combination with growing traffic in the area are beginning to negatively impact operations. Anticipated future development, including developments at River Ridge will further affect safety and operation at intersections in the design year.

Project Description:

Install wrong way signs with lights on a detector, powered by either solar installation or grid hookup. I-65 southbound at Broadway Street ramp from collector-distributor (MP 4). The exit ramp from the collector-distributer road from I-65 SB to Broadway Street will have new signs and detection.

Justification:

The effort is aimed at targeting ramps that are near locations of wrong way crashes on the Interstate and the likely entry location as well as ramps that have similar attributes. The plan is to install a mid-level treatment with detection and pole assembly holding an off the shelf available system, using a sign with flashing LED along the border on a pole at the primary locations. The secondary locations will then receive an entry-level treatment consisting of a solar powered flashing beacon.

Project Description:

Intersection improvement at the intersection of Old Vincennes Road/Lawrence Banet Road.

Justification:

An intersection improvement project is recommended for US 150 and Lawrence Banet Road in Floyds Knobs, Floyd County, IN. This location has experienced higher than anticipated crash frequency and cost. The recommended alternative would reconfigure US 150 and Lawrence Banet Road as a median U-turn intersection, eliminating left turns at the intersection and installing U-turn access points on US 150.

Project Description:

Extension of collector class roadway (Graybrook Lane) from the intersection with Bono Road/Pearl Street to the intersection of State Street. This roadway extension would further establish connections from economically depressed areas to the vital State Street corridor.

Justification:

Graybrook Lane currently deadends into Pearl Street/Bono Road intersection. By extending Graybrook Lane, the collector class roadway would be extended to an important arterial roadway of State Street which would allow citizens an easier route to connect to shopping, vital services, and transit. Furthermore, this project would allow better connections for the citizens adjacent to this project.

Project Description:

Improvement of the intersection of East Spring Street (a major arterial and gateway into the community with Beharrell Avenue (a collector class roadway). The concept is to utilize a roundabout, a proven safety counter measure, in order to improve the safety of this intersection, slow traffic entering the City of New Albany, and to enhance the livability and walkability of the surrounding areas of the community. This would also allow for a connection to the Ohio River Greenway, and provide a road diet on Spring Street that will accommodate bicycle facilities, parking, and other amenities for the community which will make this corridor more functional for all citizens and not solely drivers. The cost estimate for these intersection improvements is \$3,230,000.

Justification:

The City of New Albany is always looking to improve the safety of our roadways and intersections. The current configuration of East Spring Street effectively bisects the neighborhood along Beharrell Avenue. This project will reunite the community, improve safety, improve walkability, improve quality of place and life, all while utilizing a proven safety counter measure that is championed by the FHWA. Furthermore, this project will connect neighborhoods to the north of East Spring Street with the vital community asset that is the Ohio River Greenway.

Project Description:

The project consists of the widening of Slate Run Road from Lockwood Drive to Ekin Avenue in New Albany, Indiana. The road is being widened to create new separate bicycle lanes. Curb and gutter will be added to both sides of the roadway, and new sidewalks will be constructed outside of the curb lines.

Justification:

This is Phase 2 of an overall project for which Phase 1 construction was completed in 2021. Slate Run Road has been a safety issue for the City of New Albany due to speeding motorists and the lack of bicycle and pedestrian facilities. The roadway is highly trafficked by bicycles and pedestrians due to the existence of the Slate Run Elementary School. This project is needed to assist in traffic calming to reduce speeding motorists, as well as provide safe bicycle paths and pedestrian walkways separate and outside of the roadway to reduce the risk of fatalities and injuries along this corridor.

Project Description:

Installation of safety curb on both sides of roadway. Starting point on Allentown Road approximately 830' south of Perry Crossing Road. End point on Allentown Road approximately 1520' south of Perry Crossing Road. Includes 4 driveway culvert replacements.

Justification:

Due to age of road and buildup of asphalt, this area of Allentown Road has 8-12 inches of drop-off at edge of pavement. Safety curb will provide a transition at edge of road to prevent accidents and property damage.

AQ Analysi	s Status: F	Parent Project:		Group ID:		
Non-Exe	empt					

Project Description:

Improve safety, improve multi-modal connectivity, and reduce congestion along Billtown Road (CS-1720H) from Ruckreigel Parkway (MP 0.000) to Watterson Trail (MP 0.165). Improve access and multi-modal connectivity from Billtown Road to Eastview Avenue. The project includes the 3lane widening of existing Billtown Road between Ruckreigel Parkway and Watterson Trail, and the addition of curb and gutter and sidewalks along both sides of the road. The project also includes the extension of existing Eastview Avenue between Billtown and Taylorsville Road, where some segments of narrow roadway and right of way already exist. The Eastview extension will be a 2-lane curb and gutter roadway with sidewalks and will help to establish improved access and connectivity for the new Jeffersontown Police Station to be completed in 2023.

Justification:

The project helps to complete Jeffersontown's downtown transportation plan and establish additional points of system access and connectivity, by linking Taylorsville Road and Billtown Road, as well as a linkage to the existing dead-end portion of College Avenue in between. The extension is most critical to provide enhanced access to the new police station at the corner of Neal and Taylorsville Road and will open up access to the south.

The project supports the City's goal to provide complete streets, through the inclusion of sidewalks along each side of both Billtown and Eastview. Presently, there is a narrow sidewalk, in poor condition, and with no vertical curb separation from the road, along one side of the Billtown corridor.

The Eastview extension crosses a 2+ acre vacant parcel owned by the City. Thus, the right of way acquisition costs will be limited, and the project will help to create economic development opportunities to support the future land use plan for the vacant property.

Project Description:

Improve capacity, connectivity, and multi-modal safety along Galene Drive (CS-1010H) from Maple Road (MP 1.134) to Bluebird Lane. The project includes realigning Galene Drive/Sprowl Road, and extending this connection east, widening the collector roadway curb and gutters, and adding sidewalks and bicycle facilities. Project will include turning movements and signalization as warranted.

Justification:

The project includes a new roadway, minor roadway widening, and intersection improvements to accomplish multiple transportation goals for the City of Jeffersontown. The realignment of the Galene/Sprowl intersection with College Dr addresses a poorly configured offset intersection where vehicular and pedestrian traffic safety at the adjacent Tully Elementary School has long been an issue. The realignment of this critical intersection is the primary focus of the project west of Taylorsville Rd. East of Taylorsville Rd, the project serves as a critical new connector, providing multiple linkages to the local transportation system at Shelby Street and Bluebird Lane which both connect south to Watterson Trail, and at residential deadend streets of Valley and Pelham, which both connect north to Grand Avenue. In addition to multi-modal connectivity, this eastern portion of the corridor also provides for some areas of economic development opportunities which will also serve to benefit the community.

Project Description:

This project involves the upgrading of four existing signalized intersections along an 0.5-mile segment of Watterson Trail (CR-1004H/CS-1073H). The four intersections from south to north are: Ruckriegel Parkway (CR-1004H, MP 3.179), Maple Road/Billtown Road (CR-1004H, MP 3.330 and CS-1073H, MP 0.000), Old Taylorsville Road/Shelby Street (CS-1073H, MP 0.352), and Ruckriegel Parkway (KY 1819) (CS-1073H, MP 0.694).

lustification:

Streetscape enhancements along the downtown portion of Watterson Trail corridor under KYTC Item No. 5-3031 and 5-518 are underway. Construction of Phase I (5-3031) has begun, and Phase 2 (5-518) is in the Right of Way phase, with construction anticipated soon. The existing signalized intersections are all pole and wire-based, with only one of them offering pedestrian signals. Because the streetscape projects will include sidewalk enhancements and the construction of new sidewalks in some areas, the need for pedestrian signals and signalization modernization will become a critical requirement to enhance pedestrian safety and improve ADA compliance. The corridor intersects with Ruckregel Parkway at each end, where existing 3-way intersection conditions exists. Within the interior of the corridor, two 4-way intersections exist at Billtown/Maple and Shelby/Old Taylorsville Road. These two interior intersections serve as the match-line between the Phase 1 and Phase 2 streetscape projects.

Exempt

Project Description:

Widen English Station Road from 2 to 3 lanes (3rd lane will be a center turn lane) from Aiken Road to Avoca Road. The purpose of this project is to provide a wider roadway configuration to improve safety, increase capacity and elevate level of service. Project will improve the safety of the rail crossing and enhance bike and pedestrian network. From MP 0.457 to MP 1.232.

Justification:

The purpose of this project is to provide a wider roadway configuration to improve safety, increase capacity and elevate level of service. Project will improve the safety of the rail crossing and enhance bike and pedestrian network. Due to the two lane configuration and the numerous developments and entrances along the roadway, traffic operations are adversely impacted by vehicles making left turns along this congested corridor. Sight distance in the sag near Chenoweth Run and the crest near the railroad at the northern terminal of the project do not meet the 35 mph design speed criteria. The corridor is a high accident area. The existing roadway surface shows excessive wear with several sections having significant base failures that are not remedied by typical pavement resurfacing. The corridor is heavily traveled by trucks accessing a nearby rock quarry on Old Henry Road and school buses going to the Jefferson Public Schools maintenance facility on East Aiken. Several of the entrances have rutting on the shoulders with drop offs resulting from turning radii not adequate for truck turning movements. Rail crossing is substandard. There are gaps in the bike and pedestrian network. CHAF ID - IP20170032

Project Description:

Reconstruct/widen I-264 (Watterson Expressway) from Westport Road (KY 447) to I-71, including the US 42 interchange as a SPUI. (Project includes 5-594) (I2CCR)(I4CCR). Project length is I.7 miles. CHAF ID: IP20160046. Additional Considerations: Widen all ramps to two lanes.

Justification:

The purpose of the project is to improve system operation by reducing delays and congestion along Interstate 264 (Watterson Expressway) and the interchange at US 42. By reducing congestion and delay within the project limits the safety on US 42 and I-264. The existing I-264/US 42 interchange does not have adequate capacity or storage to accommodate the left turn and through traffic volumes during the AM and PM peak hours. Commuters are experiencing long delays.

Project Description:

KYTC Highway Plan (June, 2018): Improve safety and reduce congestion on I-265 from I-65 to US 31E.

CHAF ID: IP20080191.

Additional Considerations: Project will evaluate widening to the inside from 4 to 6 lanes.

Justification:

CHAF Purpose: Improve safety and reduce congestion on I-265 (Gene Snyder Freeway) from I-65 to US 31E (Bardstown Road).

CHAF Need: This project is needed because of deficient ramps, inadequate capacity, and higher than average crash rates on I-265 (Gene Snyder Freeway) from I-65 to US 31E (Bardstown Road). As cited in the I-265 Study of January 2015 the projected 2020 LOS along this section of I-265 is D with 2 smaller sections having LOS E and F in the PM peak, and the 2020 average PM peak v/c ratio is 0.84. The 2014 rear end crash rate from I-65 to KY 61 exceeds the average rate for the road type according to the most recent I-265 Study. 2014 ramp deficiencies include the merge lengths from Smyrna Parkway to I-265 WB and EB. Two bridges in this section are identified as functionally obsolete. The surrounding land uses are residential, commerical, and industrial. Commuters use this segment to bypass I-65 as well as gain access to I-65. Adequacy rating data point to high levels of congestion and rough pavement conditions in some areas. There is additional growth occurring now and planned for the future in this area in Jefferson County which will only worsen congestion.

Project Description:

Eastwood Fisherville Connector to I-64 (18CCN) (2020CCR). Project will consider a new interchange and connector road from KY I48 to US 60 (Shelbyville Road) with a new interchange on the I-64 corridor. Interchange would be in the vicinity of Gilliland Road.

Justification:

Reduce congestion and improve connectivity to I-64 in eastern Jefferson County between I-265 (Gene Snyder Freeway) in Jefferson County to KY 1848 (Buck Creek Road) in Shelby County.

This project is needed because in light of existing and anticipated growth, local and regional access via the interstate system and local roadway network is needed due to their being a distance of 9 miles between access to I-64 from I-265 (Gene Snyder Freeway) in Jefferson County to KY I848 (Buck Creek Road) in Shelby County. Limited access to I-64 has contributed to ever increasing traffic volumes on US 60 and KY I55/KY I48.

Project Description:

Improve safety and reduce congestion at the I-65/I-265 (Gene Snyder Freeway) interchange. CHAF IP20160019.

Justification:

The Purpose of the I-65/I-265 interchange project is to reduce congestion and improve safety. The 2015 I-265 Programming Study has projected the I-265 westbound to I-65 northbound diverge as operating at a level of service (LOS) of F in both the AM and PM peaks in the year 2020. The study also identifies the I-65 to I-265 eastbound merge as operating at a LOS of D in the AM and F in the PM peaks in the year 2020. The I-65/I-265 interchange was ranked as the 5th highest crash interchange in the KIPDA MPO area for Kentucky (Bullitt, Jefferson, and Oldham Counties). This analysis was based upon crash data for the years of 2009-2011. In that time period there were 347 total crashes within the interchange (meaning the area between the exit and entrance ramps in all directions) which included two fatalities and 5 injuries. The average daily traffic entering this interchange is 181,545 with a crash rate of 1.746 (the ratio of the number of crashes to the number of vehicles entering an interchange) and severity index of 1.071.

Project Description:

Improve safety, reduce congestion and address condition of PCC pavement on I-65 from Exit 121/KY 1526 to Exit 125/I-265 (MP 120.88 to 124.00).

Justification:

The combination of heavy traffic volumes, poor pavement condition, traffic impacts associated with incidents, and limited capacity along alternate routes creates operational issues for traffic flow and compromises safe and reliable interstate operations. A more efficient interstate system is necessary to accommodate the existing and future truck and automobile traffic projected for this high growth area. The purpose of the project is to reduce congestion, enhance existing connectivity, and improve travel time reliability along I-65 from Preston Highway (KY 61) in Lebanon Junction to the Gene Snyder Freeway (I-265) in Louisville.

Project Description:

Operational and access study for I-65 corridor from I-264 (Henry Watterson Expressway) to Broadway (US 150 in Downtown Louisville (MP 131 to MP 136). (2018BOP)

Justification:

Analyses indicate that operations degrade moving into the future with larger stretches of the corridor operating at LOS E/F during peak hours. 1,194 collisions were reported along this section of I-65 between 2017 and 2019, resulting in four fatalities and 191 injuries. Much of the corridor has segments with a CCRF greater than 1.0, but only two sections show CCRF rates higher than 1.5.

Project Description:

6YP DESC: Addition of NB and SB auxiliary lanes on I-71 near Kennedy, including operations improvements to the Zorn interchange (2004BOPC).

CHAF DESC: Improve safety and reduce congestion on I-71 from I-64 near the Kennedy interchange to Zorn Avenue.

CHAF ID: IP20150266.

Justification:

CHAF Purpose: Addition of NB and SB auxiliary lanes on I-71 near Kennedy, including operations improvements to the Zorn interchange (2004BOPC). Improve safety and reduce congestion on I-71 from I-64 near the Kennedy interchange to Zorn Avenue.

CHAF Need: This project is needed because of a higher than average crash rate, inadequate current and future capacity, and roadway deficiencies on I-71 from I-64 near the Kennedy interchange to Zorn Avenue. The critical crash rate factor (CCRF) in this 2 mile section is 2.791 as analyzed in the I-71 Study. The percentage truck traffic is 7% with multiple major traffic and freight generators as noted in the I-71 Study. The 2038 anticipated truck percent growth rate is 2.8%. This section of I-71 has a LOS F and volume to capacity ratio of 1.02. Shoulder width deficiencies and functionally obsolete culverts also exist within these milepoints.

Project Description:

Widen I-71 from four to six lanes from KY 329 (MP 14.1) to KY 393 (MP 18.0). (16CCN). Project length is 3.9 miles.

CHAF DESC: Widen I-71 from four to six lanes from KY 329 (MP 14.1) to KY 393 (MP 18.0). (16CCN) CHAF ID: IP20160192.

Additional Considerations: Widen I-71 from 4 to 6 lanes from KY 329 to KY 393.

Justification:

The Purpose of the I-71 widening and reconstruction is to address the capacity deficiencies and operational issues that currently characterize the existing corridor and provide increased efficiency and safety for the traveling public. It will serve through traffic on I-71, as well as local users traveling to and from the Louisville Metro and Crestwood/Buckner areas.

CHAF Need: The Needs being addressed by the proposed I-71 project are based on the following facts: Increasing traffic volumes have resulted in traffic congestion and poor traffic flow characteristics. In 2009, the Average Daily Traffic was near 56,600 vehicles per day (vpd). In 2015, the traffic volume has increased to approx. 61,900 vpd. By 2040, those numbers are forecasted to increase to around 80,000 vpd. Traffic projections illustrate continued growth in traffic volumes. This forecast takes into account the recent opening of the East End Bridge from I-265/KY 841 in Kentucky north to I-265 in Indiana.• I-71 has roadway deficiencies and poor traffic operational characteristics. The life span of the pavement surface and bridges warrant they be replaced within the foreseeable future, regardless of the transportation demands; the clear zones along with the inside shoulder width are less than desirable.• Driver crash rates are notably high along this section of I-71.increase to around 80,000 vpd.

Project Description:

Improve safety and reduce congestion on I-71 from I-264 to I-265, including the following sound barrier walls. A sound barrier wall on the north side of I-71 from MP. 7.5 to MP 8.7 for approximately 6,400 feet. A sound barrier wall on I-71 N from near Glenview Avenue to just north of Lime Kiln overpass for approximately 2,700 feet.

Justification:

Increase safety for all users. Manage and reduce roadway congestion where appropriate. Ensure timely and efficient movement of freight within, departing, and entering the region.

Project Description:

Improve the interchange of I-71 and KY 329.

CHAF ID: IP20080244.

Additional Consideration: Project will evaluate: signalizing SB I-71 on and off ramps; adding left turn lane on KY 329 for left turns onto SB I-71 ramp; multi-use path along KY 329; and various sight distance improvements.

Justification:

Improve safety and reduce congestion at the I-71/KY 329 interchange. This project is needed because of a high amount of crashes and limited sight distance that exists at the I-71 ramps at KY 329. Additionally, the capacity of KY 329 is inadequate to handle current traffic volumes during peak hours.

А	Q Analysis	Status:	Parent Project:		Group ID:	
	Non-Exe	mpt				

Project Description:

Improve safety and reduce congestion on I-71 from KY 53 to KY 153 (improvements may include additional travel lanes).

KIPDA Note: The project limits are from MP 22.033 to MP 24.727 (Oldham/Henry County Line) in Oldham County and from MP 24.727 to MP 28.00, outside the MPA, in Henry County.

Justification:

This project is necessary because of a higher than average crash rate compared to similar roadway segments, as well as a large amount of truck traffic on I-71 from KY 53 in Oldham County to KY 153 in Henry County. The percent of injury crashes along this section of I-71 is 30% in Oldham County and 17.5% in Henry County, which exceeds the Interstate average as referenced in the March 2014 I-71 Study of 17.4%. The percent of fatal crashes of I.4% in Oldham County exceeds the Interstate average of 0.47% cited in the study. The critical crash rate factor (CCRF) on this section in Henry County was 1.033 in 2013. The truck percentage in 2013 was 25% with a 2038 truck percent growth rate of 1.4%/yr projected by the study. There

are major traffic and truck generators near MP 22.0. Deficiencies include inside shoulder widths and sag curves.

Project Description:

Improve safety and reduce congestion on KY 1065 (Outer Loop) from I-65 to KY 2052 (Shepherdsville Road). Project will evaluate the addition of one travel lane in each direction and consider accommodations for bicyclists and pedestrians. CHAF IP20080211.

Justification:

The purpose of this project is to improve: 1) Safety, 2) Traffic flow on roadways during peak travel hours, 3) Air quality, 4) Mobility within designated freight corridors, and 5) Modal access and choice. KY 1065 from MP 4.930 to MP 7.655 (from I-65 to KY 2052) is located in south-central Jefferson County. Surrounding land use is primarily medium density commercial with some residential uses. These adequacy rating data suggest high crash potential, rough pavement condition and congestion may become an issue should the area to the south continue to develop at the current rate it is now. Additional commercial development has been planned along this corridor.

Project Description:

Improve safety and reduce congestion at the KY 1065 and KY 61 intersection. Project will consider adding a right turn lane on westbound KY 1065 (Outer Loop) at KY 61 (Preston Highway). CHAF IP20080120.

Justification:

The purpose of this project is to improve: 1) Safety, 2) Traffic flow on roadways during peak travel hours, and 3) Air quality. There is currently insufficient right turn capacity on westbound Outer Loop approaching KY 61. The intersection has had a total of 98 crashes between 5/1/2011 and 4/30/2016, including 44 injuries and one fatality. The highest crash types are angle (44) and real end (43). It is ranked the #5 for crash amount in Jefferson County.

Project Description:

Improve safety and reduce congestion on KY 146 (LaGrange Road) from KY 329B (KY 329 Bypass) to KY 393. Includes consideration of a four lane widening and bike/ped accommodations.

IP20080251.

Justification:

The purpose of this project is to improve safety and reduce congestion on KY 146 (LaGrange Road) from KY 329B (KY 329 Bypass) to KY 393. This project is needed because there there are sections of KY 146 from KY 329B (KY 329 Bypass) to KY 393 that has inadequate capacity and is frequently congested during peak hours. With planned development in Oldham County, this area is expected to grow and this segment is expected to carry approximately 36,000 vehicles by the year 2030, greatly increasing congestion and the potential for crashes (OCMTP, 2003).

	Total S	\$0 \$240,000	\$240,000

Project Description:

Reduce congestion, improve safety, and enhance mobility on KY 146 in Buckner from KY 1817 (New Cut Road) (MP 6.81) to KY 393 (MP 7.42). Project will consider a two-way left turn lane between KY 1817 to KY 393 and bike and pedestrian facilities.

Justification:

Congestion exists in this section of KY 146, created by the presence of many intersecting roads (some at sharp approach angles) and entrances to schools and recreational facilities. Speed differentials exist with a speed limit change NB approaching KY 1817 from 45 mph to 35 mph, and a drop to 25 mph when school is in session. Rear-end crashes are the predominate collision type.

Project Description:

Reduce congestion and improve safety along KY 1747 (Hurstbourne Parkway) from Stong Brook Drive to I-64.

Justification:

Intersections with KY 155, Bunsen Parkway, and Bluegrass Parkway/I-64 eastbound off-ramps (Exit 15A) operate at LOS E or F during peak hours. Most intersections along the study corridor have individual turn movements operating at LOS F. The Critical Rate Factor (CRF) for this section from 2012 to 2016 ranges from 3.18 to 5.01. Public input for recent Planning Study indicated lack of and need for bicycle and pedestrian accommodations, suggesting a multi-modal safety issue.

Project Description:

Reconstruct and widen KY 1819 (Watterson Trail) - Plantside Drive to Bluegrass Parkway.

Justification:

Sponso

This section of Watterson Trail has many vertical curves that do not meet minimum sight distance criteria for the design speed of the road. Existing traffic volumes have exceeded the roadway's capacity and future traffic volumes are predicted to increase significantly. Several intersections have less-than-desirable radii. Critical Rate Factors were above 0.60 (2012-2016) and the current KAB LOSS is 2.

Project Description:

Safety improvements on KY 1865 (New Cut Road)/Taylor Boulevard from MP 0.5 (just south of Old New Cut Road) to MP 5.766 (just north of the I-264 ramp).

Justification:

Route is part of Louisville Metro's High Injury Network under their Vision Zero Safety Program. The routes identified in Louisville's High Injury Network will guide the city's Safer Roads strategy, in support of Louisville's vision to eliminate roadway deaths on surface streets by 2050.

This project strives to implement safety improvements for all users along the KY 1865/New Cut Road corridor consistent with Metro's 2024 KY 1865 New Cut Road/Taylor Blvd Safety Study.

AQ Analys	is Status:	Parent Project:		Group ID:		
Non-Ex	empt					

Project Description:

Improve safety and reduce congestion on KY 1931 (Manslick Road) from KY 1931 (St. Andrews Church Road) to I-264 (Henry Watterson Expressway). Project will evaluate 3-lane widening and consider accommodations for bicyclists and pedestrians. CHAF IP20080221.

Justification:

The purpose of the proposed KY 1931 project is to improve safety and local traffic operations along this route between Dixie Highway and I-264. Other project goals include accommodating bicyclists and pedestrians, improving emergency response time, minimizing impacts to the environment, and ensuring any improvement can handle traffic from other planned improvements. The need is expressed through above average crash rates, substandard geometric features, and congested traffic operations. Existing traffic volumes range from 11,100 to 18,200 vehicles per day, with the heavier volumes in the middle section between Palatka Road and Hazelwood Avenue. Existing volume-to-capacity ranges from 0.60 to 0.96, largely controlled by signalized intersections. Three intersections (Blanton Lane, Palatka Road, and Hazelwood Avenue) operate at an unacceptable LOS (E or F) during the AM or PM peak hour. The segment of the corridor between Arnoldtown Road and Blanton Lane has the highest crash frequencies; in four years, 65 total reported crashes occurred. This equates to a Critical Rate Factor of 1.92, indicating crashes are happening more often than can be attributed to random occurrence. The entire corridor south of Hazelwood Avenue exhibit CRFs over 1.00. A review of existing plans and where necessary, field observations, identified a deficient horizontal curve, several deficient vertical curves that limit headlight sight distance, and several sections where the cross-section does not meet current standards.

AQ Analysis Non-Exe		Parent Project:		Group ID:	

Project Description:

Three lane widening along KY 1931 from the Doss High School entrance to Palatka Road, including intersection improvements with Palatka Road and turn lanes.

Justification:

Improve safety and local traffic operations along KY 1931 (Saint Andrews Church Road) between Doss High School/Trunnell Elementary and KY 1142 (Palatka Road). This project is needed because KY 1931 (Saint Andrews Church Road) between Doss High School/Trunnell Elementary and KY 1142 (Palatka Road) experiences frequent congestion during peak hours and needs significant improvements in safety and local traffic operations. There are above average crash rates, substandard geometric features, and traffic is expected to continue to increase along this stretch of roadway.

Project Description:

Widen KY 1931 (Manslick Road) from 2 to 3 lanes from US 31W (Dixie Highway) to Doss High School. (2014BOP). Project length is 1.739 miles.

CHAF IP2008020.

Justification:

The purpose of the project is to improve safety, local traffic operations, and mobility for all modes along KY 1931 (Manslick Road) from Dixie Highway (US 31W) to Doss High School. The Critical Rate Factor (CRF) along this segment is greater than 1.0 and over half of the crashes throughout the corridor are rear end collisions, with the next highest type being angle crashes at 20%. This segment experiences congested traffic operations. The KY 1931 corridor links US 31W an Urban Principal Arterial to I-265. Medium density commerical and residential uses abut this segment.

Project Description:

Improve the safety and congestion of KY 1932 (Chenoweth Lane) from US 60 (Shelbyville Road) to US 42 (Brownsboro Road). Approximately 1.07 miles (2014BOP).

Justification:

CHAF Purpose: The purpose of the Chenoweth Lane project - from the CSX railroad (just north of Shelbyville Road) to Brownsboro Road is to 1) Improve sight distance and safety for all users, 2) Improve drainage along the corridor and 3) Improve pedestrian safety and mobility.

CHAF Need: The needs stem from a higher than average crash rate in the southern section, pedestrian strike history, sight distance obstructions, obstructions in the clear zones, inadequate drainage in the corridor, substandard shoulders, and narrow (east side) and incomplete (west side) sidewalks that do not meet Americans with Disabilities Act of 1990 (ADA) compliance.

Project Description:

Improve safety, reduce congestion, and enhance mobility along the KY 1934 (Greenbelt Highway)/Cane Run Road) corridor from the KY 841/KY 1934 interhcange to Ralph Avenue (MP 0.0-MP 10.081).

Justification:

AADT varies from 7,600 vpd at the southern terminus of KY 1934 at US 31W (Dixie Highway) to 47,000 at the interchange with I-264 near the northern end of the corridor.

KABCO LOSS for the overall extent of the corridor is 3. However, when broken into segments due to change in cross-section, three out of the four sections had a KAB LOSS of 4.

There are only a few short sections of unconnected sidewalk along the Greenbelt portion of the route. Sidewalk generally exists on both sides of all sections of Cane Run Road to just south of Terry Road.

TARC Route 19 services much of the corridor, with limited schedules and circulation through the Riverport area.

	Exempt		2114			

Project Description:

Reduce congestion, improve safety, and enhance mobility on KY 2050 (Herr Lane) from Prince Valiant Drive/Westmar Terrace to Bedford Lane.

The project will consider elements consistent with the KIPDA Complete Streets Policy, the KYTC Complete Streets Policy, and the KYTC Complete Streets, Roads, and Highways Manual.

Justification:

Herr Lane is an important transportation corridor providing access to and between several neighborhoods, commercial areas, and major arterials. It also provides access to several schools including Ballard High School, Kammerer Middle School, Wilder Elementary School, and St. Albert the Great.

Herr Lane experiences operational delays directly related to the intersection at Westport Road. Lack of turn lane storage at that intersection leads to queued traffic and extensive delays on Herr Lane during both morning and afternoon peaks. The traffic queues also lead to an excessive number of crashes. The proximity of Prince Valiant Drive to Westport Road also leads to conflicts between left-turning vehicles and queued traffic on Herr Lane. Pedestrian facilities are provided along the east side of Herr Lane through the project corridor. However, there are no pedestrian facilities on the west side of Herr Lane between Graymoor Road and Westport Road.

Project Description:

Improve safety and reduce congestion on KY 22 from just east of Murphy Lane to Haunz Lane. Project design will evaluate 3-lane widening with twoway center turn lane and consider bicycle and pedestrian facilities. CHAF IP20110072.

Justification:

The purpose of this project is to Improve safety and reduce congestion on KY 22 from Haunz Lane to KY 329. This project is needed because the crash rate is high (particularly at the end of the project near KY 329), multiple roadway deficiencies exist, and projected growth results in inadequate capacity on KY 22 from Haunz Lane to KY 329. Roadway deficiencies include horizontal curves and numerous vertical curves. Continued development in the area along this corridor will contribute to congestion issues in the future.

Project Description:

Widen KY 245 from Bernheim Forest to the Community College. (08CCN)(10CCR)(14CCR)(16CCR) From Milepoint 4.425 to Milepoint 6.415. CHAF ID IP20150316.

Additional Considerations: Four lanes, plus turn bays are assumed from the SB I-65 Ramps to a point approximately I.7 miles E of the I-65 Interchange.

Justification:

The purpose of the KY 245 Widening Project is to provide an improved transportation facility to meet the additional traffic demand forecasted to occur and accommodate any existing or future developments, and/or tourist destinations along the corridor. KY 245 leading southward from its interchange with I-65 is the major link between I-65 and the City of Bardstown and the western entrance to the Kentucky Bourbon Trail. The area has significant institutions and tourist destinations near the interchange that attracts local traffic, visitors and travelers along I-65. Among the most important attractions are the Bernheim Arboretum, Jim Beam Distillery, The Boy Scout Camp, Bernheim Middle School and the Bullitt County Fairgrounds which hosts many events during the year. Currently the roadway is a two lane minor rural arterial. Traffic volumes increased from 9,520 ADT in 1991 to 12,800 ADT in 2007 and it is projected to grow to 17,200 ADT in 2034. A proposed Hotel development is planned on the North side of KY 245 next to 1-65 interchange, which will increase current volumes. Local officials indicated the need to improve access to local institutions expected to enhance tourism and economic development. The proposed road is expected to provide a safe and efficient facility, help address future traffic demand, and generate an entry way that integrates businesses and natural areas creating a major tourist center.

Justification:

Existing KY 329 (Railroad Avenue) crosses CSX Railroad just north of the intersection with KY 146 in Crestwood. The geometry of the rail crossing causes tractor-trailers and other long wheelbase vehicle to become hung-up and stranded on the active railroad facility. Vehicles must be removed with assistance from an emergency recovery vehicle. CSX records showed at least 170 unique incidents where trucks became stuck at the KY 329 crossing between January 2016 and January 2021. Various options to alleviate the situation will be explored in the project design process.

Project Description:

KY 393 reconstruction from 140 feet south of railroad crossing (CSX) extending northwest towards KY 146 ending at Station 12+00 (Design under 5-230.00). (Construction Seq.#2). IP20160227.

Justification:

The primary purpose of the proposed project is to improve traffic flow and correct safety deficiencies through reconstruction and realignment of the existing facility, including construction of an underpass to replace the at-grade crossing of the CSX Railroad paralleling KY 146. The proposed improvements will accommodate the predicted increase in traffic volumes, reduce accident potentials, upgrade connections with I-71, and improve traffic service and safetyfor the large Oldham County school complex along the west side of existing KY 393 at KY 146.

The project will correct identified traffic problems associated with existing design deficiencies, sight distance, grades and curves, train/automobile conflicts, school complex ingress and egress, emergency service demands, travel safety, travel time, and convenience. An improved facility is needed because of the route's importance in the local and regional transportation network and the necessity for improving system connectivity and travel conditions for school buses, emergency services, farm equipment, commercial vehicles, and local public access.

Project Description:

CHAF: Section I -I from I-65 to Chimney Rock Drive (06CNN).

CHAF ID: IP20150318.

Additional Considerations: Propose 2 added lanes per CHAF database.

Justification:

CHAF Purpose: The purpose of this project is to reduce congestion, improve safety and provide for better emergency vehicle access. This project would provide improved connectivity between the cities of Mt. Washington and Shepherdsville.

CHAF Need: From the approved design executive summary (DES) completed in 2012 for the 2030 No-Build Analysis this segment has a Critical Rate Factor (CRF) of 1.9, a volume to capacity ration (V/C) of 1.83 and level of service (LOS) of F. Pedestrian facilities currently terminate at Lees Valley Road.

Project Description:

Section 5 - From US 31EX to US 31E Bypass. (2008BOPC). Project length is 0.45 miles. IP20150201.

Justification:

The purpose of the KY 44 project is to reduce congestion, improve safety and provide for better emergency vehicle access.

The 3/2012 DES (5-150.01 in Attachments) for the KY 44 corridor cited a CRF of 2.3 for this segment and projected a 2030 V/C of 1.73 and a LOS of F in the No-Build Alternative. This project would provide improved connectivity between the cities of Mt. Washington and Shepherdsville.

Project Description:

Reconstruct KY 44 from Bogard Lane to Armstrong Lane (2020CCN). Improvements may include additional travel lanes and a continuous center turn lane.

Justification:

The project is intended to reduce congestion and improve safety on KY 44 from Bogard Lane to Armstrong Lane. Project will consider five lane widening and bike/ped accommodations. This project is needed because the capacity of KY 44 does not adequately accommodate existing or future traffic volumes. In addition, the existing roadway exhibits a higher than average crash rate due to the volume of traffic.

Project Description:

Improve safety, reduce congestion, and improve multi-modal transportation options along KY 61 from Commerce Crossings Drive (BMP 1.395) to Briden Avenue (EMP 8.400) including the I-264 (Watterson Expressway) and I-265 (Gene Snyder Freeway) interchanges. CHAF IP20160018.

Justification:

Improve safety, reduce congestion, and improve multi-modal transportation options along KY 61 from Commerce Crossings Drive to Briden Avenue including the I-264 (Watterson Expressway) and I-265 (Gene Snyder Freeway) interchanges. The KY 61 corridor from Commerce Crossings Drive to Briden Avenue had four roadway segments ranked in the top 41 of the highest roadway crash segments in the KIPDA MPO area for Kentucky (Bullitt, Jefferson, and Oldham Counties). This analysis was based upon crash data for the years of 2009-2011. KY 61 from Blue Lick Road to Outer Loop was ranked 13th with an average daily traffic (ADT) of 31,500 and crash rate of 10.6 (crashes per million vehicle miles traveled). KY 61 from Fern Valley Road to East Indian Trail was ranked 19th with an ADT of 28,100 and crash rate of 6.7. KY 61 from Gilmore Lane to Grade Lane was ranked 39th with an ADT of 27,300 and crash rate of 5.3. KY 61 from Outer Loop to McCawley Road was ranked 41st with an ADT of 24,500 and crash rate of 7.5.

Project Description:

Transportation system management improvements on US 31W from KY 841 to KY 44 in Southern Jefferson County; to include the consideration of access management and safety improvements. IP20080193

Justification:

The purpose of this project is to improve: 1) Safety, 2) Traffic flow on roadways during peak travel hours, 3) Air quality, 4) Mobility within designated freight corridors, and 5) Modal access and choice.

US 31W (Dixie Highway) is one of the busiest and most important transportation corridors in the region. It is frequently congested (LOS E, F found at multiple intersections), has very high total and fatal crash rates, and passes through several low- and moderate-income neighborhoods. It also hosts the region's best performing transit route, Route 18, which serves the project corridor with over 4,800 daily riders. The high transportation demand by both vehicular and transit riders results in low speeds and long delays at critical locations. The volume of vehicular traffic coupled with the presence of numerous access points and intersections contributes to congestion and safety issues.

Project Description:

KY 864 - Widen Beulah Church Road from 2 to 3 lanes from I-265 to Cedar Creek Road. Project length I.627 miles. CHAF IP20080206.

Justification:

Improve the access, safety and mobility of Beulah Church Road south of the Gene Snyder Freeway. The Beulah Church Road (KY 864) corridor is a rapidly developing section of Louisville with increasing traffic demand. KY 864 is classified as an urban collector and has many access points. It carries traffic from growing residential suburbs to the Gene Snyder Freeway (I-265) with growth expected to continue. According to the 'Traffic Forecast Report, Jefferson County, Widen KY 864, Item No. 5-481.00', which was published January 25, 2013, the 2012 Average Daily Traffic (ADT) Count was 7,600 vehicles per day (vpd), and the projected 2035 ADT is 9,600 vpd. Additionally, the Cooper Chapel Road extension (5-404.01) to Bardstown Road (US 31E) which is currently under design, is anticipated to bring additional traffic to the route once constructed. Safety is also a primary concern within the project corridor. Between January 2010 and February 2015, there have been 27 collisions in the project corridor, 19 with property damage, and 8 collisions with 11 with injuries.

Project Description:

Major revision of the intersection located at the Outer Loop, Fegenbush Lane, and Beulah Church Road. Turn lane to be completed by Transportation Cabinet per agreement. (04CCN)(08CCR)(10CCR)(12CCR) CHAF IP20160080.

Justification:

Sponsor A

The primary purpose of the project is to relieve the vehicle delay and improve safety while considering the possible residential, commercial, environmental, and historical impacts of any solution. Currently KY 1065 (Outer Loop), Fegenbush Lane, Beulah Church Road, and Watterson Trail (CR-1005H) converge within 900' of each other. The junction is controlled by two signalized intersections. Both are plagued by excessive vehicle delay during the morning and evening peak periods. The Critical Rate Factor (CRF) for this section of KY 1065 is 1.817 from 2012 to 2016.

Project Description:

Extend Plantside Drive from Rehl Road to Taylorsville Road.

Justification:

The purpose of this project is to improve: 1) Safety, 2) Traffic flow on roadways during peak travel hours, 3) Air quality, and 4) Mobility within designated freight corridors. The following needs have been identified for this project: 1) Improve Roadway Safety, 2) Improve Access and Increase Capacity for all vehicle types.

U C Sponsor Agency: KYTC	2025 2026	HSIP-ST HSIP-ST Total Project Name: US 31E	\$450,000 \$4,680,000 \$5,130,000	\$50,000 \$520,000 \$570,000	\$500,000 \$5,200,000 \$5,700,000

Justification:

AADT on the route varies from 35,000 vpd near the Bullitt County Line to 48,000+ near the I-265 interchange. The portion of the route between Fairmount Road and Seatonville Road was identified by KIPDA in 2016 as operating at LOS F. That congestion is expected to expand south to Mt. Washington and north to Breckenridge Lane in a 2040 No-build scenario.

KYTC Safety Congestion Network Screening data (2016-20) reveals that 9 intersections in this segment of US 31E have an LOSS-KAB of 4. There are 6 additional locations with an LOSS-KAB of 3. There were 419 reported crashes during that time period.

TARC's Bardstown Road routes have some of the highest ridership rates in their system. Schools, shopping and other community facilities near the l-265 interchange could benefit from both transit accommodation and the enhancement of bicycle and pedestrian mobility.

Exem	pt		2673 - Bicycle & Pe	destrian Improvements	- Kentucky

Project Description:

Reconstruct the intersection of Bardstown Road (US 31E) and Baxter Avenue (KY 1703) for pedestrian safety.

Justification:

Crashes along the corridor are noticeably high for both pedestrians and autos. Project would provide a crosswalk on the south side of Bardstown Road where Baxter Avenue and Bardstown Road split. Jaywalking in this section is a very frequent occurrence, as the path with crosswalks is over 400' to use the crosswalk at Highland Avenue.

Exemp	ot				

Project Description:

Reconstruct US 42 and widen from 2 lanes to 3 lanes (3rd lane will be a center turn lane) from Jefferson/Oldham County Line to Ridgemoor Drive. Project will include the consideration of improvements to the Hayfield Way intersection (2004BOPC).

CHAF ID: IP20080245.

Justification:

The purpose of the project is to improve traffic flow, minimize congestion, and address safety issues on US 42 between the Jefferson County/Oldham County line and Ridgemoor Drive.

Due to an increase in commuters to and from Louisville and the development along the project corridor, the traffic volumes are expected to double in the next 20 years. The accident data for the last 3 years shows that there are between 10 and 14 rear end crashes between Hunters Ridge and Ridgemoor Drive each year. The existing profile along this stretch of US 42 contains vertical geometric deficiencies for the posted speed of 45 MPH and has a critical crash rate factor greater than 1.0 (which indicates, statistically, a higher rate than roads of similar functional classifications).

Project Description:

Improve traffic flow, minimize congestion, and address safety issues on US 42 between Ridgemoor Drive and KY 1694 (Gum Street). Includes consideration of a three lane widening and bike/ped accommodations. IP 20080246

Justification:

The purpose of the project is to improve traffic flow, minimize congestion, and address safety issues on US 42 between Ridgemoor Drive and KY 1694 (Gum Street). This project is needed because or current and projected capacity issues and roadway deficiencies on US 42 between Ridgemoor Drive and KY 1694 (Gum Street). Local commuters use this route daily to travel to and from Jefferson County. There are five schools located within the project's corridor or within a 1/2 mile of the corridor. Congestion is very heavy at peak travel hours. Continued development in this area along this corridor will contribute to congestion issues in the future. Substandard lane and shoulder widths exist along with vertical curves.

AQ Analysis Exemp		Parent Project:		Group ID:	

Project Description:

Reconstruct Arnoldtown Road as a 2 lane road (no additional lanes) from KY 1931 (Saint Andrews Church Road) to KY 907 (3rd Street Road) with turning lanes at high volume intersections including Windsor Lakes, Windsor Forest, Mountain Brook and Hardwood Forest. Add sidewalks on both sides of Arnoldtown Road for the length of the project.

Justification:

The Arnoldtown Road reconstruction project is intended to improve the geometrics of the existing roadway. The project will correct poor curves, narrow lanes, and the lack of shoulders and will increase safety for drivers. This roadway has had approximately 180 crashes between January 1st, 2013 and December 31, 2017 with two fatalities. The project will also increase pedestrian safety and accessibility with the addition of sidewalks where they do not currently exist.

Project Description:

The Baxter/Bardstown Premium Transportation Corridor Project is a design-build project that will: 1) streamline transit service on a key corridor by adding traffic signal bus prioritization, new bus stops, and increasing bus service frequency; 2) bring intelligent signal upgrades, which will include upgraded traffic signals and communication equipment to support premium transit and overall mobility; 3) incorporate complete streets roadway improvements by including bicycle and pedestrian facilities, intersection safety improvements, access management strategies for surrounding land uses, and new streetscape design elements.

Justification:

Fiber optic cable will bring the potential for intelligent traffic signal upgrades, which will include upgraded traffic signals and communication equipment to support premium transit and overall mobility. The byproduct of the future upgrade of the corridor will provide the future projects of incorporating complete streets roadway improvements by including bicycle and pedestrian facilities, intersection safety improvements, access management strategies for surrounding land uses, and new streetscape design elements. This project is highly prioritized in the followingns: ITS Implementation Master Plan, Bardstown/Baxter Safety Study, and Move Louisville.

Project Description:

Phase 3: Extend and construct 2 lane roadway with a continuous center-turn lane from KY 864 (Beulah Church Road) to US 31E (Bardstown Road) at Bardstown Falls Road. Project will include consideration of bicycle and pedestrian facilities.

Justification:

The area south of I-265 (Gene Snyder Fwy.) between KY 61 (Preston Highway) and US 31E (Bardstown Road) is experiencing rapid growth with the development of many new residential subdivisions. Cooper Chapel Road is a heavily traveled collector road serving this area.

The Location and Feasibility Study will establish and preserve a corridor for the future extension of Cooper Chapel Road so that it can be established as a through route between KY 61 and US 31E.

The roadway construction will provide access to an area that recently received sanitary sewers and city water service.

Sponsor Agency: Louisville Metro Project Name: One-Way Street Conversion to Two-Way Phase I

KIPDA ID:	State ID/DES #:	Open to Public:	County/Counties:	Project Cost:	Project Score:
1809	5-470.00	2027	Jefferson	\$18,871,175	123
AQ Analysis	s Status:	Parent Project:		Group ID:	
Non-Exe	empt				

Project Description:

Design and construction for the conversion of the following one-way streets in downtown Louisville to two-way traffic flow: Jefferson Street (Floyd to Baxter Avenue); Liberty Street (Jackson to Baxter); Muhammad Ali Boulevard (Jackson to Chestnut Connector); Chestnut Street (Jackson to Chestnut Connector); 8th Street (Kentucky to Main); 7th Street (Oak to Main); Shelby Street (Gray to Main Street); and Campbell Street (Chestnut to Main Street).

Justification:

One-way streets make for efficient movers of traffic, but can often introduce safety concerns for motorists, bicyclists and pedestrians because they tend to provide for higher travel speeds than two-way streets and in some cases hinder opportunities for economic development as certain businesses have a formal policy against locating on one-way streets. The benefits of two-way streets are numerous. They tend to have slower travel speeds than one-way streets, they reduce confusion for motorists unfamiliar with the area, they provide better access to both businesses and residential areas, and in some circumstances they can reduce the traffic load on other one-way streets.

AQ Analysis Non-Exer		Parent Project:		Group ID:	

Project Description:

Convert 2nd Street and 3rd Street (KY 1020) from one-way couplets to two-way traffic between West Cardinal Boulevard (MP 10.32) and Broadway (MP 12.10). Design and construct safety improvements at all intersections in between the termini, including consideration of: rebuild traffic signals to box spans with retroreflective backplates, remove previously warranted traffic signals and convert to all-way stops, crosswalk visibility enhancements, curb bulb-outs, dedicated left- and right-turn lanes, bicycle lanes, walkways such as sidewalks and ADA ramps, lighting, and set appropriate speed limits for all road users.

Justification:

Improve safety for all modes of transportation by emphasizing one street to be used by motor vehicles and minimizing the other street for throughmotorists. Appropriate vehicular speeds and calmed traffic will restore the neighborhood character, support local businesses, and ensure equitable and sustainable modes of transportation are accessible to all people.

AQ Analysi Non-Exe		Parent Project:		Group ID:	

Project Description:

This project will transform 9th Street/Roy Wilkins Avenue just west of the downtown Louisville from the Main Street to Broadway from a six-lane thoroughfare with extremely wide right-of-way into a "Complete Street." Improvements to be considered during the Design process include: Reduce the number and width of lanes, convert one-way traffic to two-way (with a two-way left turn lane) on Muhammad Ali Boulevard and Chestnut Street/River Park Drive, eliminate negative offset left-turn lanes, adequately dimensioned turn bays, traffic signal upgrades, expanded fiber throughout the corridor, protected/permissive left turns at signals, sidewalk expanded up to 20-feet wide, curb extensions, pedestrian refuge islands, pedestrian scale lighting, crosswalk visibility enhancements, tabled intersections, protected bike lanes, improved signage, bus shelters, kiosks with real-time bus information, dedicated bus lanes, bus bulbs, increased tree canopy, bioswales, and improved storm drainage.

Justification:

Eliminate the physical and psychological barrier that the "9th Street divide" creates between Louisville's Central Business District and the West End neighborhoods; create a safe and accessible travel experience for all users including pedestrians, cyclists and transit riders; increase economic vitality through creating a safe, attractive and comfortable environment; provide opportunities for parks and open spaces, playgrounds, recreation access, street tree canopy and storm water management features; and provide a safe and efficient corridor for vehicle and freight travel.

Project Description:

Improve safety on 10 roadway corridors by employing low-cost, high-impact strategies, including: street rightsizing (road diets), roundabouts, sidewalks and ADA ramps, curb extensions and pedestrian refuge islands, ladder-style crosswalks and other types of improved striping, traffic signal improvements (rebuild signals and add retroreflective backplates), bus shelters, raised medians, and mid-block crossing pedestrian signals.

Justification:

Improve safety at the locations that were identified through the Vision Zero Louisville Safety Report (2021) Technical Appendix, Table 19. While the primary goal is to improve safety for bicyclists and pedestrians, especially in underserved communities, this project also supports goals to improve equity, climate, sustainability, quality job creation, and economic strength and global competitiveness by making Louisville's streets safe for all people.

Project Description:

Widen Commerce Parkway between Parker Drive and KY 393 adding a continuous turn lane for approximately three miles including the relocation of 10' wide shared-use path. Lane width is 12' with one proposed signal between termini. Project length is 3 miles.

Justification:

The purpose of the project is to improve capacity, access, and mobility along Commerce Parkway through an actively developing industrial and business park. The widening of the road will reduce congestion, improve safety, and increase travel capacity and alternatives for residents, businesses, and freight traffic given the anticipated direct connection with new I-71 ramps.

Project Description:

Construct a new urban roadway section to connect KY 146 and KY 329 Bypass in Crestwood.

Justification:

The purpose of this project is to improve access and mobility within the northern portion of Crestwood by improving connectivity between KY 329 B and KY 146. The development of a new roadway connector between these facilities will reduce congestion at the existing intersection between KY 329 B and KY 146 and increase travel alternatives for residents and truck traffic while also providing greater access to the South Oldham school campus.

Project Description:

This project will align Wooldridge Avenue and Clore Lane with left-turn lanes and right-turn pockets on both streets as well as add dedicated leftturn lanes on KY 22. Trees and vegetation will be cleared for increased visibility.

Justification:

The KY 22 Corridor Improvement Study completed by Oldham County, KYTC and KIPDA in 2022, looked at KY 22 from the Jefferson/Oldham County line near Haunz Lane to KY 329. This project was identified in the study as the highest priority spot improvement. This intersection had the highest number of total crashes, more severe crashes, and the highest crash factor (1.58) of all intersections studied. It was also the top safety concern identified during two rounds of public engagement.

Project Description:

Construction of an uninterrupted rail underpass west of LaGrange on Allen Lane. The project will widen Allen Lane between KY 146 and Commerce Parkway aligning across from the I-71 Overpass.

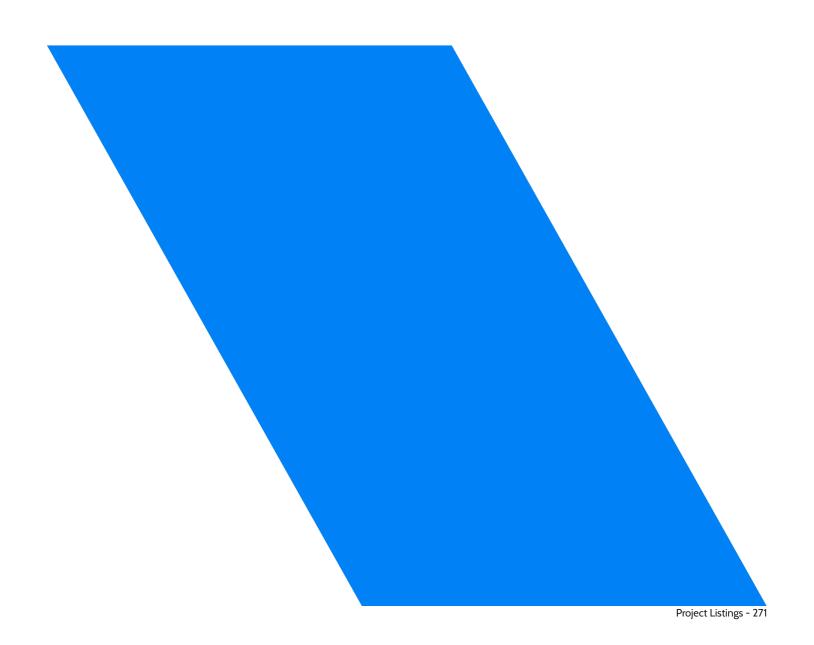

Justification:

The project will allow traffic to be unimpeded by the very heavily used CSX rail line improving congestion. It will also provided enhanced safety as emergency vehicles will be able to bypass the rail line.

Sponsor Agency: TARC		Project Name: Bus Stop and Access Improvements - Muhammad Ali and Chestnut Street Corridor					
KIPDA ID: 3137	State ID/DES #:	Open to Public: 2023	County/Counties: Jefferson	Project Cost: \$300,000	Project Score: 150		
AQ Analysis Exemp		Parent Project:		Group ID:			

Project Description:

This project proposes to expand the number of ADA accessible bus stops, increase pedestrian access and connectivity to the fixed-routes, improve mobility independence for transit users of all ages and abilities and removing barriers for people with disabilities. Work includes improvements of the existing or new public transit bus stops and their surroundings which include pedestrian facilities, ADA access, the construction or reconstruction of boarding areas and sidewalks, shelters, benches, trash receptacles, lighting, and ITS amenities. Primary routes in the corridor are Route 19 and 21. Route 19 operates from southwest areas of Louisville through downtown to St. Matthews, serving the NIA Center, the UL Medical Center & Hospitals, Crescent Hill, and Frankfort Avenue. Route 21 operates between Shawnee Park, downtown Louisville, and the Highlands area, serving the NIA Center, Barrett Avenue Government Center, Bellarmine University and the Bashford Manor Lane commercial area.

Justification:

Providing facilities at bus stops helps make transit more accessible, comfortable, and convenient to customers; thereby encouraging usage. Providing sidewalk and pedestrian infrastructure eliminates barriers to vulnerable populations, creating a safer, more equitable environment. Upgrades to the transit amenities are received positively by the community at large. Better amenities and boarding areas are a significant improvement in assisting the community and increase passenger security and the perception of safety for public transit, thereby improving the perception of transit and increasing transit ridership. The transit facility improvements in the M. Ali and Chestnut Street corridor will promote interaction in the public space by providing opportunities for people to meet and be exposed to a variety of neighbors, increase civic participation by fostering communication, and promote the power and preservation of place through introducing sustainable infrastructure.

AQ Analysis	Status:	Parent Project:		Group ID:				
Exemp	t							

Project Description:

TARC is requesting funding to implement pedestrian access and bus stop improvements that will enhance public transportation amenities and improve safety and access to transit. This proposed project will improve existing public transit bus stops and their surroundings, with a focus on pedestrian facilities. A well maintained and clean bus stop can affect the public's perception, and often the reality of a stop's safety and security, thereby encouraging transit usage and decreasing VMT. This proposed project combines the three fundamental elements of sustainable infrastructure- social, environmental and economic. Funds received will be used for the purchase and installation of proposed shelters and amenities within the public right of way. This project will enhance the experience of the user waiting to board or transfer between the two major TARC routes, #28 Preston HWY and #29 Eastern Pkwy. Added pedestrian amenities will help solidify public access across the intersection.

Justification:

These sites are at a valuable intersection of frequent and crosstown service and provide connections to hospitals, universities, employment, retail, and high-density residential areas. This project will facilitate economic development in the community by creating small pockets of public space at each corner of the node and better integrate the intersection with the parkway system. New amenities and enhanced landscape will elevate the aesthetic at the front doors of area businesses and attract customers. These areas have high levels of pedestrian activity based on their proximity to retail establishments, high density residential areas, and social services. Typically, a bench or trash receptacle addresses issues of the property owner and the TARC customer by defining the bus stop and improving the appearance and comfort of the adjacent property. Better amenities and boarding areas are a significant improvement in assisting the community and increasing passenger security.

Study of a potential Louisville Downtown Transit Center. The study intends to Establish operational specifications for a downtown transit center, identify potential locations, design line-level routing through downtown, facilitate stakeholder engagement and community input around the project, provide high level cost assumptions for land acquisition, design, and construction.

Justification:

Transit centers provide critical, centralized infrastructure to transit users at high activity locations. These can include purchasing passes, transfering between routes, providing convenient locations for operators to relieve other operators, and other opportunities to enhance the transit experience. Transit centers consolidate services to a single location, increasing regional access to jobs and social services and improve operations. Transit centers can integrate other community amenities such as commercial space, public wi-fi, and restrooms for operators.

Project Description:

Electric vehicle charging infrastructure at various locations along Indiana interstates. Round 1 electric vehicle charging infrostructure at 4222 Charlestown Road, New Albany, IN 47150, and 1540 Veterans Parkway, Jeffersonville, IN 47130. DES #2400612. Round 2 and 3 locations TBD.

Justification:

The National Electric Vehicle Infrastructure Formula Program strategically deploys electric vehicle charging infrastructure and supports an interconnected network to facilitate data collection, access, and reliability. Eligible funding uses include acquisition and installation of electric vehicle charging infrastructure to serve as a catalyst for the deployment of such infrastructure and to connect it to a network to facilitate data collection, access, and reliability; proper operation and maintenance of electric vehicle charging infrastructure; data sharing about electric vehicle charging infrastructure to ensure the long-term success of investments.

THE FEDERAL CERTIFICATION PROCESS

CERTIFICATION OF TRANSPORTATION PLANNING PROCESS

Federal regulations require that the metropolitan transportation planning process be certified in accordance with: 23 U.S.C. 134, 49 U.S.C. 5303, and 23 CFR part 450.300; sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42U.S.C. 7504, 7506 (c) and (d)), and 40CFR part 93; Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d–1) and 49 CFR part 21; 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity; Section 1101(b) of the FAST Act (Pub. L. 114–357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects; 23 CFR part 230, regarding the implementation of an equal employment opportunity program on federal and federal-aid highway construction contracts; the provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38; the Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving federal financial assistance; Section 324 of Title 23 U.S.C. regarding the prohibition of discrimination based on gender; and Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Certifications assuring compliance with applicable federal regulations are included in Figure 17 on the next page.

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) conducted the most recent certification review of KIPDA's urban transportation planning process on June 22 and 23, 2022. On September 20,2022, FHWA and FTA determined that the planning process substantially meets the requirements under 23 USC 134 and 49 USC 5303.

The Honorable David Voegele Chairman, KIPDA Transportation Policy Committee Louisville Area Metropolitan Planning Organization c/o Kentuckiana Regional Planning and Development Agency 11520 Commonwealth Drive Louisville, KY 40299

Subject: Louisville Area TMA Federal Certification Review

Dear Judge Voegele:

This letter notifies you that the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) jointly certify the planning process for the Louisville Area Transportation Management Area (TMA). This certification is based on the findings from the Federal Certification Review conducted on June 22 and 23, 2022.

The overall conclusion of the enclosed Certification Review is that the planning process for the Louisville Area TMA complies with the spirit and intent of federal metropolitan transportation planning laws and regulations under 23 USC 134 and 49 USC 5303. The planning process at the Louisville Area TMA is a continuing, cooperative, and comprehensive process and reflects a significant professional commitment to deliver quality in transportation planning.

We would like to thank Jarrett Haley, Executive Director and his staff for their time and assistance in planning and conducting the review. Enclosed is a report that documents the results of this review and offers three corrective actions and ten recommendations for continuing quality improvements and enhancements to the planning process. The Certification Review Team also noted four noteworthy practices. This report has been transmitted concurrently to the MPO, the Kentucky Transportation Cabinet, the Indiana Department of Transportation, and the Transit Authority of River City.

If you have any questions regarding the certification review process, the certification action, and/or the enclosed report, please direct them to Bernadette Dupont, Transportation Specialist, FHWA Kentucky Division, at <u>Bernadette.Dupont@dot.gov</u> or (502) 223-6729 and Aviance Webb, Community Planner, FTA Region 4, at <u>Aviance.Webb@dot.gov</u> or (404) 865-5489.

APPENDIX C Public Participation

FY 2025-2028 Transportation Improvement Program Public Comments

• Please prioritize pedestrian accessibility to JMF - southwest Louisville is becoming more of a heat sink, and with planned lane widening and induced demand, it sounds like that will increase.

• Bike lanes without physical barriers are seen as unsafe by bikers and annoying by drivers - encouraging them to either use the same road or to provide some sort of block in between the lanes would be more functional.

• Impressive reach-out for comments! TY Sure you are crazy busy. Quick overview of almost 300 page Doc, could not even find a mention of Light Rail. What am I missing? It is so painfully obvious the region needs LR(lightail). Why is this not being formally explored?

• Add a ramp from Dupont Road (behind Norton Medical Plaza) to the collector for I-64 ramp to the I-264 (Watterson Expressway) to relieve all of the congestion from Dutchman Lane to Breckinridge Lane (1932) to Watterson Expressway.
